

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended: December 31, 2007

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission File Number 0-09992

KLA-Tencor Corporation

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

04-2564110
(I.R.S. Employer
Identification No.)

One Technology Drive
Milpitas, California
95035
(Address of principal executive offices)
(Zip Code)

(408) 875-3000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by checkmark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of January 16, 2008 there were 180,050,561 shares of the registrant's Common Stock, \$0.001 par value, outstanding.

KLA-TENCOR CORPORATION
Notes to Condensed Consolidated Financial Statements
(Unaudited)

NOTE 1 – BASIS OF PRESENTATION

Basis of Presentation. The condensed consolidated financial statements have been prepared by KLA-Tencor Corporation (“KLA-Tencor” or the “Company”) pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the unaudited interim financial statements reflect all adjustments (consisting only of normal, recurring adjustments) necessary for a fair statement of the financial position, results of operations and cash flows for the periods indicated. These financial statements and notes, however, should be read in conjunction with Item 8, “Financial Statements and Supplementary Data” included in the Company’s Annual Report on Form 10-K for the fiscal year ended June 30, 2007, filed with the SEC on August 20, 2007.

The condensed consolidated financial statements include the accounts of KLA-Tencor and its majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated. The Company has included the results of operations of acquired companies from the date of acquisition.

The results of operations for the three- and six-month periods ended December 31, 2007 are not necessarily indicative of the results that may be expected for any other interim period or for the full fiscal year ending June 30, 2008.

Management Estimates. The preparation of the condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Reclassifications. The Company has reclassified certain prior period balances to conform to the current year presentation. These reclassifications did not impact any prior amounts of reported total assets, total liabilities, stockholders’ equity, results of operations or cash flows.

Recent Accounting Pronouncements. In December 2007, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards (“SFAS”) No. 141 (Revised 2007), *Business Combinations*. SFAS 141(R) retains the fundamental requirements of the original pronouncement requiring that the purchase method be used for all business combinations. SFAS 141(R) defines the acquirer as the entity that obtains control of one or more businesses in the business combination, establishes the acquisition date as the date that the acquirer achieves control and requires the acquirer to recognize the assets acquired, liabilities assumed and any noncontrolling interest at their fair values as of the acquisition date. In addition, SFAS 141(R) requires expensing of acquisition-related and restructure-related costs, remeasurement of earn out provisions at fair value, measurement of equity securities issued for purchase at the date of close of the transaction and non-expensing of in-process research and development related intangibles. SFAS 141(R) is effective for the Company’s business combinations for which the acquisition date is on or after July 1, 2009. The Company is currently evaluating the impact of the implementation of SFAS No. 141(R) on its consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*. This Statement amends ARB 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. It requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. This Statement establishes a single method of accounting for changes in a parent’s ownership interest in a subsidiary that do not result in deconsolidation. SFAS No. 160 is effective for the Company’s fiscal year beginning July 1, 2009. The Company is currently evaluating the impact of the implementation of SFAS No. 160 on its consolidated financial position, results of operations and cash flows.

In June 2007, the FASB ratified Emerging Issues Task Force (“EITF”) Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities*. This issue provides that nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities should be deferred and capitalized. Such amounts should be recognized as an expense as the related goods are delivered or the related services are performed. EITF Issue No. 07-3 is effective for the Company’s fiscal year beginning July 1, 2008. The adoption of EITF Issue No. 07-3 is not expected to have a material impact on the Company’s consolidated financial position, results of operations and cash flows.

[Table of Contents](#)

NOTE 3 – BUSINESS COMBINATIONS

During the three months ended December 31, 2007, the Company acquired a development stage company for \$4.0 million. The acquisition has been accounted for as a purchase of assets primarily consisting of in-process research and development (“IPR&D”) for which technological feasibility has not been established and no future alternative uses exist. Upon the completion of the acquisition the Company expensed IPR&D of \$3.4 million. The fair value of the purchased IPR&D and identified intangibles was determined using the income approach, which discounts expected future cash flows from projects to their net present value. Each project was analyzed to determine the technological innovations included; the utilization of core technology; the complexity, cost and time to complete development; any alternative future use or current technological feasibility; and the stage of completion. Future cash flows were estimated, taking into account the expected life cycles of the products and the underlying technology, relevant market sizes and industry trends. The Company determined a discount rate for each project based on the relative risks inherent in the project’s development horizon, the estimated costs of development, and the level of technological change in the project and the industry, among other factors.

On October 11, 2006, the Company completed its acquisition of all of the shares of ADE Corporation (“ADE”), a supplier of semiconductor process control solutions. With the acquisition, the Company gained entry into the wafer metrology market, expanded into a broader range of products and services, and gained access to ADE’s workforce and intellectual property portfolio.

The following table summarizes the fair values of the net assets acquired in conjunction with the ADE acquisition:

<u>(In thousands)</u>	<u>Purchase Price Allocation</u>
Cash	\$ 99,673
Current assets	77,949
Intangibles:	
Existing technology	59,900
Patents	30,200
Trade name / Trademarks	11,800
Customer relationships	26,800
In-Process R&D	2,900
Other intangible assets	8,300
Noncurrent assets	10,613
Goodwill	235,116
Liabilities assumed (1)	(72,172)
	<u>\$ 491,079</u>
Cash consideration	\$ 490,070
Value of options assumed	1,009
Total consideration	<u>\$ 491,079</u>

(1) \$5.2 million of accrued restructuring created as a result of the acquisition has been included in liabilities assumed.

NOTE 4 – GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

The following table presents goodwill balances and the movements during the six months ended December 31, 2007:

<u>(In thousands)</u>	<u>Amount</u>
As of June 30, 2007	\$311,856
Adjustments	(1,647)
As of December 31, 2007	<u>\$310,209</u>

Goodwill represents the excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired in each business combination. The carrying value of goodwill was allocated to KLA-Tencor’s reporting units

Table of Contents

pursuant to Statement of Financial Accounting Standards (“SFAS”) No. 142. In accordance with SFAS No. 142, KLA-Tencor completed its annual evaluation of goodwill by reporting unit during the quarter ended December 31, 2007 and concluded that there was no impairment as of December 31, 2007. There have been no significant events or circumstances affecting the valuation of goodwill subsequent to the impairment test performed in the quarter ended December 31, 2007. Adjustments to goodwill during the six months ended December 31, 2007 resulted primarily from revisions to purchase price allocations related to entities that were acquired in the fiscal year ended June 30, 2007. For a detailed description of acquisitions completed in the fiscal year ended June 30, 2007, refer to Note 5, “Business Combinations” to the Consolidated Financial Statements included in Item 8 of the Company’s Annual Report on Form 10-K for the year ended June 30, 2007.

Purchased Intangible Assets

The components of purchased intangible assets as of December 31, 2007 and June 30, 2007 were as follows:

(in thousands)	Range of Useful Lives	As of December 31, 2007			As of June 30, 2007		
		Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Existing technology	4-7 years	\$ 97,233	\$ 24,862	\$ 72,371	\$ 96,534	\$ 14,152	\$ 82,382
Patents	6-13 years	38,997	13,935	25,062	38,997	8,114	30,883
Trade name / Trademark	4-10 years	20,835	3,952	16,883	20,835	2,086	18,749
Customer relationships	6-7 years	44,870	7,272	37,598	44,870	3,591	41,279
Other	0-1 year	10,750	9,641	1,109	10,695	8,556	2,139
Total		\$ 212,685	\$ 59,662	\$ 153,023	\$ 211,931	\$ 36,499	\$ 175,432

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. During the three months ended December 31, 2007, the Company discontinued certain products acquired during the fiscal year ended June 30, 2007. Accordingly, the Company determined that based on estimated cash flows, the carrying amount of certain related intangible assets, primarily existing technology and patents, exceeded fair value by \$6.2 million. An impairment charge of \$6.2 million was recorded during the three months ended December 31, 2007, of which \$5.9 million was recorded to costs of revenues and \$0.3 million to engineering, research and development costs.

For the three months ended December 31, 2007 and 2006, amortization expense for purchased intangible assets was \$8.5 million and \$12.7 million, respectively. For the six months ended December 31, 2007 and 2006, amortization expense for other intangible assets was \$16.9 million and \$13.5 million, respectively. Based on the intangible assets recorded as of December 31, 2007, and assuming no subsequent additions to, or impairment of the underlying assets, the remaining estimated amortization expense is expected to be as follows:

Fiscal year ending June 30:	Amortization (In thousands)
2008 (remaining 6 months)	\$ 16,088
2009	30,893
2010	30,793
2011	29,786
2012	26,698
Thereafter	18,765
Total	\$ 153,023

NOTE 5 – STOCK-BASED COMPENSATION

KLA-Tencor applies the provisions of SFAS No. 123(R), *Share-Based Payment*. SFAS No. 123(R) establishes accounting for stock-based awards exchanged for employee services. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the employee’s requisite service period.

Table of Contents

The following table shows pre-tax stock-based compensation expense for the three and six months ended December 31, 2007 and 2006:

(In thousands)	Three months ended December 31,		Six months ended December 31,	
	2007	2006	2007	2006
Stock-based compensation expense:				
Costs of revenues	\$ 4,700	\$ 8,002	\$ 10,953	\$ 16,589
Engineering, research and development	7,109	11,243	15,701	22,948
Selling, general and administrative	11,443	(3,177)	24,681	13,578
Total stock-based compensation	\$ 23,252	\$ 16,068	\$ 51,335	\$ 53,115

As of December 31, 2007, the unrecognized stock-based compensation balance was \$190.5 million.

Stock Options

The following table shows the number of options granted and grant-date fair value after estimated forfeitures for the three and six months ended December 31, 2007 and 2006:

(In thousands)	Three months ended December 31,		Six months ended December 31,	
	2007	2006	2007	2006
Number of options granted	12	—	24	190
Grant-date fair value after estimated forfeitures	\$ 208	\$ —	426	\$ 1,947

As of December 31, 2007, the unrecognized stock-based compensation balance related to stock options was \$74.5 million and will be recognized over an estimated weighted average amortization period of 2.1 years.

The following table shows stock-based compensation capitalized as inventory and deferred system profit as of December 31, 2007 and June 30, 2007:

(In thousands)	December 31, 2007	June 30, 2007
Inventory	\$ 6,507	\$ 6,229
Deferred system profit	\$ 1,057	\$ 1,386

Valuation Assumptions

The Company estimates the fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of SFAS No. 123(R), as clarified by SEC SAB No. 107. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option valuation model and the straight-line attribution approach with the following weighted-average assumptions:

	Three months ended December 31,		Six months ended December 31,	
	2007	2006	2007	2006
Stock option plan:				
Expected stock price volatility	36%	(*)	34%	35%
Risk free interest rate	4.0%	(*)	4.4%	5.0%
Dividend yield	1.1%	(*)	1.0%	1.2%
Expected life of options (in years)	4.7	(*)	4.7	4.4
Stock purchase plan:				
Expected stock price volatility	32%	(*)	32%	35%
Risk free interest rate	4.9%	(*)	4.9%	5.1%
Dividend yield	0.9%	(*)	0.9%	1.2%
Expected life of options (in years)	1.3	(*)	1.3	1.3

(*) There were no stock options issued during the three months ended December 31, 2006.

SFAS No. 123(R) requires the use of option-pricing models that were not developed for use in valuing employee stock options. The Black-Scholes option-pricing model was applied for use in estimating the fair value of short-lived exchange traded options that have no vesting restrictions and are fully transferable. In addition, option-pricing models require the input of highly subjective assumptions, including the option's expected life and the expected price volatility of the underlying

Table of Contents

stock. The expected stock price volatility assumption was determined using the implied volatility of the Company's common stock. The Company's computation of expected volatility is based on market-based implied volatility from traded options on the Company's stock. In the quarter ended September 30, 2005, the Company determined, and the Company continues to believe, that implied volatility is more reflective of market conditions and a better indicator of expected volatility than a blended volatility.

Equity Incentive Program

The Company's equity incentive program is a broad-based, long-term retention program that is intended to attract and retain key employees, and align stockholder and employee interests. The equity incentive program consists of two plans: one under which non-employee directors may be granted options to purchase shares of the Company's stock, and another in which non-employee directors, officers, key employees, consultants and all other employees may be granted options to purchase shares of the Company's stock, restricted stock units and other types of equity awards. For the past several years until June 30, 2006, stock options were generally granted at the market price of the Company's common stock on the date of grant, with a vesting period of five years and an exercise period not to exceed seven years (ten years for options granted prior to July 1, 2005) from the date of issuance. Restricted stock units may be granted with varying criteria such as time-based or performance-based vesting. Substantially all of the Company's employees that meet established performance goals and qualify as key employees participate in its main equity incentive plan. Since July 1, 2006, the Company has granted only restricted stock units under its equity incentive program, except for options granted to non-employee directors, which were part of their regular compensation package for service through the end of the first quarter of fiscal year 2008 but are no longer a component thereof.

On October 18, 2004, the Company's stockholders originally approved the 2004 Equity Incentive Plan (the "2004 Plan"), and the stockholders approved an amendment to the 2004 Plan on November 15, 2007 to, among other things, increase the number of shares of the Company's common stock reserved for issuance under the 2004 Plan by 8.5 million shares. The 2004 Plan provides for the grant of options to purchase shares of the Company's common stock, stock appreciation rights, restricted stock units, performance shares, performance units and deferred stock units to its employees, consultants and members of its Board of Directors. Since the adoption of the 2004 Plan, no further grants are permitted under the 1982 Stock Option Plan or 2000 Nonstatutory Stock Option Plan. The 2004 Plan permits the issuance of up to 21.0 million shares of common stock, of which 7.3 million shares were available for grant as of December 31, 2007. Any 2004 Plan awards of restricted stock units, performance shares, performance units or deferred stock units with a per share or unit purchase price lower than 100% of fair market value on the grant date shall be counted against the total number of shares issuable under the 2004 Plan as 1.8 shares for every one share subject thereto. Total options outstanding under all plans as of December 31, 2007 were 16.3 million. During the six months ended December 31, 2007, approximately 0.5 million restricted stock units were granted to senior management with performance-based vesting.

The following table summarizes the combined activity under the equity incentive plans for the indicated periods:

<u>(In thousands except for Weighted-Average Exercise Price)</u>	<u>Available For Grant</u>	<u>Options Outstanding</u>	<u>Weighted- Average Exercise Price</u>
Balances at June 30, 2007	3,317	19,585	\$ 42.28
Plan shares expired	(316)	—	—
Options granted	(24)	24	\$ 54.81
Restricted stock units granted(1)	(3,785)	—	—
Restricted stock units canceled(1)	456	—	—
Shares added to plans	8,500	—	—
Options canceled/expired/forfeited	610	(610)	\$ 46.43
Options exercised	—	(2,744)	\$ 39.01
Balances at December 31, 2007(2)	<u>8,758</u>	<u>16,255</u>	<u>\$ 44.36</u>

- (1) Any 2004 Plan awards of restricted stock units, performance shares, performance units or deferred stock units with a per share or unit purchase price lower than 100% of fair market value on the grant date shall be counted against the total number of shares issuable under the 2004 Plan as 1.8 shares for every one share subject thereto.

Table of Contents

- (2) The 2004 Plan is the only equity incentive plan under which the Company is currently authorized to issue restricted stock units. As of December 31, 2007, there were 7.3 million shares available for grant under the 2004 Plan, which amount is equivalent to 4.0 million restricted stock units available for grant after giving effect to the provision in the 2004 Plan that provides that restricted stock unit awards shall be counted against the total number of shares issuable under the 2004 Plan as 1.8 shares for every one share subject thereto.

The weighted-average grant date fair value of options, as determined under SFAS No. 123(R), granted during the six months ended December 31, 2007 and 2006 was \$17.95 and \$13.51 per share, respectively. As of December 31, 2007, 11.8 million options were exercisable with a weighted-average exercise price of \$41.93 per share and weighted-average remaining contractual term of 4.7 years. The aggregate intrinsic value for the options exercisable as of December 31, 2007 was \$73.6 million.

The total intrinsic value of options exercised during the six months ended December 31, 2007 and 2006 was \$54.9 million and 10.0 million, respectively. The total cash received from employees as a result of employee stock option exercises during the six months ended December 31, 2007 and 2006 was approximately \$107.1 million and \$18.4 million, respectively. In connection with these exercises, the tax benefits realized by the Company for the six months ended December 31, 2007 and 2006 were \$18.9 million and \$3.6 million, respectively.

Restricted Stock Units

The following table shows the number of restricted stock units granted and grant-date fair value for the three and six months ended December 31, 2007 and 2006:

(In thousands)	Three months ended December 31,		Six months ended December 31,	
	2007	2006	2007	2006
Number of restricted stock units granted	1,867	62	2,103	2,598
Grant-date fair value	\$ 53,357	\$ 2,175	\$ 61,663	\$ 83,482

Beginning in the fiscal year ended June 30, 2007, the restricted stock units generally vest in two equal installments on the second and fourth anniversaries of the date of grant. Prior to the fiscal year ended June 30, 2007, the restricted stock units generally vested in two equal installments over four or five years from the anniversary date of the grant. The value of the restricted stock units was based on the closing market price of the Company's common stock on the date of award. The restricted stock units were awarded under the 2004 Plan, and each unit will entitle the recipient to one share of common stock when the applicable vesting requirements for that unit are satisfied. However, for each share actually issued under the awarded units, the share reserve under the 2004 Plan will be reduced by 1.8 shares, as provided under the terms of the 2004 Plan.

As of December 31, 2007, the unrecognized stock-based compensation balance related to restricted stock units was \$115.9 million and will be recognized over an estimated weighted-average amortization period of 3.0 years. Additionally, the number of restricted stock units outstanding as of December 31, 2007 was 5.2 million.

Employee Stock Purchase Plan

KLA-Tencor's Amended and Restated 1997 Employee Stock Purchase Plan ("ESPP") provides that eligible employees may contribute up to 10% of their eligible earnings toward the semi-annual purchase of KLA-Tencor's common stock. The ESPP is qualified under Section 423 of the Internal Revenue Code. The employee's purchase price is derived from a formula based on the fair market value of the common stock at the time of enrollment into the offering period versus the fair market value on the date of purchase. Offering periods are generally two years in length. On September 28, 2006, the ESPP was suspended due to the ongoing stock option investigation and was not reactivated until February 2007, and accordingly there were no shares purchased under the ESPP during the three and six months ended December 31, 2006. A cash payment in lieu of the estimated financial benefit of participating in the ESPP was provided to employees below the Vice President level who had been active participants in the ESPP before it was temporarily suspended. There were 0.6 million shares purchased under the ESPP during the three and six months ended December 31, 2007. In connection with the disqualifying dispositions of shares purchased under the ESPP, the Company realized tax benefits of \$0.3 million and \$0.9 million for the three and six months ended December 31, 2007, respectively.

The number of shares available for issuance under the ESPP is replenished annually, typically on the first day of each fiscal year, by virtue of an evergreen provision. The provision allows for share replenishment equal to the lesser of 2.0 million shares or the number of shares which KLA-Tencor estimates will be required to be issued under the ESPP during the forthcoming fiscal year. As of December 31, 2007, a total of 1.5 million shares were reserved and available for issuance under the ESPP.

Former Chief Executive Officer Agreement and Termination

During November 2005, the Company announced that effective January 1, 2006, Kenneth L. Schroeder would cease to be its Chief Executive Officer and would thereafter be employed as a Senior Advisor. The Company and Mr. Schroeder also revised his prior agreement with the Company and defined the salary, bonus payout and equity award vesting during the period of his employment as a Senior Advisor. Effective January 1, 2006, the Company determined that all service conditions associated with certain prior equity awards under the terms of the revised agreement with Mr. Schroeder had been satisfied; and accordingly, the Company recorded at that time an additional non-cash, stock-based compensation charge of approximately \$9.8 million relating to these equity awards. The above mentioned charge is included as a component of Selling, General and Administrative (“SG&A”) expense during fiscal 2006. On October 16, 2006, following the Special Committee investigation of the Company’s historical stock option practices, the Company terminated all aspects of Mr. Schroeder’s employment relationship and agreement with the Company. As a result, vesting of Mr. Schroeder’s then outstanding stock options and restricted stock awards immediately ceased, and the 0.9 million unvested option shares and 0.1 million unvested restricted stock award shares held by Mr. Schroeder at the time of termination were canceled. Accordingly, in the second quarter of fiscal 2007 the Company reversed \$20.3 million of the non-cash, stock-based compensation charges that had been recorded in prior periods related to unvested option shares and restricted stock award shares. In December 2006, the Company canceled 0.6 million vested option shares held by Mr. Schroeder as of the time of termination, representing those shares that had been retroactively priced or otherwise improperly granted.

IRC Section 409A Affected Options

Because virtually all holders of retroactively priced options that had been issued by the Company were not involved in or aware of the retroactive pricing, the Company took certain actions to deal with the adverse tax consequences that may have been incurred by the holders of retroactively priced options. The adverse tax consequences were that retroactively priced stock options vesting after December 31, 2004 (“409A Affected Options”) subject the option holder to a penalty tax under IRC Section 409A (and, as applicable, similar penalty taxes under California and other state tax laws). One such action by the Company involved offering to amend the 409A Affected Options to increase the exercise price to the market price on the actual grant date or, if lower, the market price at the time of the amendment. The amended options would not be subject to taxation under IRC Section 409A. Under IRS regulations, these option amendments had to be completed by December 31, 2006 for anyone who was an executive officer when he or she received 409A Affected Options; the amendments for non-officers could not be offered until after the Company’s Annual Report on Form 10-K for the fiscal year ended June 30, 2006 and Quarterly Report on Form 10-Q for the quarter ended September 30, 2006 were filed and did not need to be completed until December 31, 2007. During the fiscal year ended June 30, 2007, the Company accrued approximately \$20.2 million payable to non-executive holders of the amended options to compensate them for the resulting increase in their option exercise prices. The \$20.2 million is payable in January 2008. The amount of these bonuses would be effectively repaid to the Company if and when the options are exercised and the increased exercise price is paid. However, there is no assurance that the options will be exercised and the employees will retain the bonuses under all circumstances. During the three months ended December 31, 2006, the Company has recorded approximately \$7.4 million to compensate certain option holders whose employment terminated or who had already exercised 409A Affected Options for the additional taxes they incur under IRC Section 409A (and, as applicable, similar state tax laws).

Three of the Company’s option holders were subject to the December 31, 2006 deadline described above. Accordingly, in December 2006, the Company offered to amend the 409A Affected Options held by Mr. Wallace, the Company’s Chief Executive Officer, and two former executive officers to increase the exercise price so that these options will not subject the option holder to a penalty tax under IRC Section 409A. All three individuals accepted the Company’s offer. In addition, the Company agreed to pay each of the three individuals a cash bonus in January 2008 equal to the aggregate increase in the exercise prices for his amended options. For Mr. Wallace, the amount of this bonus is \$0.4 million. To account for these actions, the Company has recorded a charge of \$0.3 million, net of amount reclassified from capital in excess of par, during the three and six months ended December 31, 2006.

In addition, in the quarter ended December 31, 2007, the Company agreed to amend 409A Affected Options held by two other executives and, in connection with those amendments, agreed to pay cash bonuses in January 2008 to those two executives equal to the aggregate increase in the exercise prices for such 409A Affected Options. Accordingly, the Company accrued \$0.2 million during the three months ended December 31, 2007.

With respect to certain former officers whose options were canceled or re-priced by the Company following the Special Committee investigation, no bonuses of the type described above will be paid.

[Table of Contents](#)

NOTE 6 – STOCK REPURCHASE PROGRAM

In July 1997, the Board of Directors authorized KLA-Tencor to systematically repurchase shares of its common stock in the open market. Since the inception of the repurchase program in 1997 through December 31, 2007 the Board of Directors had authorized KLA-Tencor to repurchase a total of 47.8 million shares. The Company's systematic buyback program was suspended in May 2006, and resumed in February 2007. The Company accounts for repurchased common stock under the cost method and includes such treasury stock as a component of its stockholders' equity. During the three and six months ended December 31, 2007, the common stock repurchases of \$133.6 million and \$817.1 million, respectively, reduced capital in excess of par and retained earnings. At December 31, 2007, \$7.3 million of the above repurchase payment amounts remained outstanding and unpaid and was recorded in other current liabilities (and, therefore, the consolidated statement of cash flows for the six months ended December 31, 2007 reflects cash paid for common stock repurchases of \$809.8 million).

Share repurchases for the three and six months ended December 31, 2007 were as follows:

<u>(In thousands)</u>	<u>Three months ended December 31, 2007</u>	<u>Six months ended December 31, 2007</u>
Number of shares of common stock repurchased	2,700	14,356
Total cost of repurchase	\$ 133,555	\$ 817,089

NOTE 7 – EARNINGS PER SHARE

Basic earnings per share is calculated by dividing net income available to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is calculated by using the weighted-average number of common shares outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if the dilutive potential shares of common stock had been issued. The dilutive effect of outstanding options and restricted stock units is reflected in diluted earnings per share by application of the treasury stock method, which includes consideration of stock-based compensation required by SFAS No. 123(R) and SFAS No. 128, *Earnings Per Share*. The following table sets forth the computation of basic and diluted earnings per share:

<u>(In thousands, except per share amounts)</u>	<u>Three months ended December 31,</u>		<u>Six months ended December 31,</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Numerator:				
Net income	\$ 83,935	\$ 90,049	\$ 172,093	\$ 225,971
Denominator:				
Weighted average shares outstanding, excluding unvested restricted stock units	181,241	199,789	184,516	199,603
Effect of dilutive options and restricted stock units (1)	3,958	5,166	4,606	4,223
Denominator for diluted earnings per share	<u>185,199</u>	<u>204,955</u>	<u>189,122</u>	<u>203,826</u>
Basic earnings per share	\$ 0.46	\$ 0.45	\$ 0.93	\$ 1.13
Diluted earnings per share	\$ 0.45	\$ 0.44	\$ 0.91	\$ 1.11

- (1) 6.7 million potentially dilutive securities are excluded from the computation of diluted earnings per share for the three months ended December 31, 2007 because their effect would have been anti-dilutive.

During the three months ended December 31, 2007, the Company's Board of Directors authorized a quarterly cash dividend of \$0.15 per share, which was paid on December 3, 2007 to stockholders of record as of the close of business on November 19, 2007. During the three months ended December 31, 2006, the Company declared and paid a quarterly cash dividend of \$0.12 per share. The total amount of dividends paid during the three and six months ended December 31, 2007 was \$27.2 million and \$55.6 million, respectively. The total amount of dividends paid during the three and six months ended December 31, 2006 was \$24.2 million and \$48.1 million, respectively.

NOTE 8 – COMPREHENSIVE INCOME

The components of comprehensive income, net of tax, are as follows:

<u>(In thousands)</u>	<u>Three months ended</u> <u>December 31,</u>		<u>Six months ended</u> <u>December 31,</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Net income	\$ 83,935	\$ 90,049	\$ 172,093	\$ 225,971
Other comprehensive income (loss):				
Currency translation adjustments	8,002	3,852	22,990	2,746
Gain (loss) on cash flow hedging instruments, net	(1,551)	233	(10,770)	5,327
Change in unrecognized losses and transition obligation related to pension and post retirement plans	40	—	54	—
Unrealized gains (losses) on investments (1)	2,188	(1,971)	4,839	4,319
Other comprehensive income	\$ 8,679	\$ 2,114	\$ 17,113	12,392
Total comprehensive income	\$ 92,614	\$ 92,163	\$ 189,206	238,363

(1) Taxes (benefits) included in unrealized gains (losses) on investments

NOTE 9 – INCOME TAXES

The Company recorded a provision of \$22.8 million and \$129.4 million for the three months and six months ended December 31, 2007, which represent effective tax rates of 21.4% and 42.9%, respectively. The increase in the effective tax rate for the six months ended December 31, 2007 over prior periods was primarily due to the immediate impact of \$46.6 million of incremental U.S. tax expense associated with the implementation of the Company's global manufacturing strategy during the three months ended September 30, 2007. This increase was offset by a reduction of tax expense of \$23.6 million in connection with the expense recorded during the three months ended December 31, 2007 related to the proposed settlement of the shareholder class action lawsuit (see Note 10, "Litigation and Other Legal Matters"). In addition, there was an increase to the effective tax rate for the six months ended December 31, 2007 compared to the year ended June 30, 2007, due to decreases in the tax benefits related to tax exempt interest, research and development credit and extraterritorial income exclusion. We expect the tax rate in future periods of the year ending June 30, 2008 to result in an annual rate of approximately 37% which includes the effect of the higher tax expense associated with the implementation of our global manufacturing strategy offset by the tax benefit related to the expense to settle the shareholder class action lawsuit.

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* ("FIN 48"), on July 1, 2007. FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109, *Accounting for Income Taxes*. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

As a result of the adoption of FIN 48, the Company increased the liability for net unrecognized tax benefits by \$8.4 million, and accounted for the increase as a cumulative effect of change in accounting principle that resulted in a reduction of retained earnings of \$8.4 million at July 1, 2007. The Company has historically classified accruals for tax uncertainties in current taxes payable. Upon adoption of FIN 48, the Company has reclassified taxes payable of \$62.1 million from current to non-current liability. In addition, as a result of the adoption of FIN 48, at December 31, 2007, long-term liabilities increased by \$24.4 million; non-current deferred tax assets increased by \$17.3 million; and goodwill related to acquisitions decreased by \$1.3 million.

As of the adoption date of FIN 48, the Company had gross tax effected unrecognized tax benefits of approximately \$77.2 million of which \$72.5 million, if recognized, would affect the effective tax rate, while the remaining \$4.7 million would reduce acquisition related goodwill. The change in the uncertain tax benefits for the three months and six months ended December 31, 2007 was a decrease of approximately \$3.2 million and an increase of \$8.1 million, respectively, related to various tax positions. The Company anticipates an increase of approximately \$5.3 million to the unrecognized tax benefits during the remainder of the year ending June 30, 2008, related to various tax positions. The Company has included the effects of these items in current estimates of the forecasted tax provision for the year ending June 30, 2008. The Company will reexamine the tax provision and the effect of estimated unrecognized tax benefits on the financial position at each reporting period.

The Company's policy is to include interest and penalties related to unrecognized tax benefits within interest income and other, net. As of the adoption date of FIN 48, the Company had accrued interest and penalties related to unrecognized tax benefits of approximately \$12.9 million. The accrued interest and penalties on unrecognized tax benefits increased by approximately \$1.0 million and \$2.1 million, respectively, for the three months and six months ended December 31, 2007 to \$15.0 million as of December 31, 2007.

The Company conducts business globally and, as a result, the Company and one or more of its subsidiaries file income tax returns in various jurisdictions throughout the world, including with the United States federal government, various U.S. states and foreign jurisdictions. In the normal course of business the Company is subject to examination by taxing authorities throughout the world. The Company is not under federal income tax examination at this time, except for an Internal Revenue Service Audit covering calendar year 2006 related to the Company's historical stock option practices. The Company remains subject to federal income tax examination for all years from the year ended June 30, 2004. The Company has concluded federal income tax examinations up through the year ended June 30, 2004. The Company is subject to state income tax examinations for all years from the year ended June 30, 2002. The Company recently concluded a tax examination in California for the years ended June 30, 2004 and 2005 and is currently under examination in various states. The Company is also subject to examinations in major foreign jurisdictions, including Israel and Singapore, for all years from the year ended June 30, 2002 and is currently under tax examinations in various foreign tax jurisdictions.

NOTE 10 – LITIGATION AND OTHER LEGAL MATTERS

Government Inquiries and SEC Settlement Relating to Historical Stock Option Practices. On May 23, 2006, the Company received a subpoena from the United States Attorney's Office ("USAO") requesting information relating to the Company's past stock option grants and related accounting matters. Also on May 23, 2006, the Company received a letter from the SEC making an informal inquiry and request for information on the same subject matters. The Company learned on February 2, 2007 that the SEC had opened a formal investigation into these matters. The Company cooperated fully with the SEC investigation. On July 25, 2007, the Company announced that it had reached a settlement with the SEC by consenting to the entry of a permanent injunction against future violations of the reporting, books and records, and internal controls provisions of the federal securities laws. The settlement resolves completely the SEC investigation into the Company's historical stock option granting practices. KLA-Tencor was not charged by the SEC with fraud, nor was the Company required to pay any civil penalty, fine or money damages as part of the settlement.

The Company is cooperating fully with the USAO's continuing inquiry and intends to continue to do so. This inquiry may require the Company to expend significant management time and incur significant legal and other expenses, and could result in criminal actions seeking, among other things, injunctions against the Company and the payment of significant fines and penalties by the Company, which may adversely affect its results of operations and cash flow.

The Company has also responded to inquiries from the U.S. Department of Labor, which is conducting an examination of the Company's 401(k) Savings Plan prompted by the Company's stock option issues. The Company is cooperating fully with this examination and intends to continue to do so. Further, the Internal Revenue Service is conducting an audit covering calendar year 2006 related to the Company's historical stock option practices.

The Company cannot predict how long it will take, or how much more time and resources will be required, to resolve these government inquiries, nor can it predict the outcome of these inquiries. Also, there can be no assurance that other inquiries, investigations or actions will not be started by other United States federal or state regulatory agencies or by foreign governmental agencies.

Shareholder Derivative Litigation Relating to Historical Stock Option Practices. Beginning on May 22, 2006, several persons and entities identifying themselves as shareholders of KLA-Tencor filed derivative actions purporting to assert claims on behalf of and in the name of the Company against various of the Company's current and former directors and officers relating to its accounting for stock options issued from 1994 to the present. The complaints in these actions allege that the individual defendants breached their fiduciary duties and other obligations to the Company and violated state and federal securities laws in connection with the Company's historical stock option granting process, its accounting for past stock options, and historical sales of stock by the individual defendants. Three substantially similar actions are pending, one in the U.S. District Court for the Northern District of California (which consists of three separate lawsuits consolidated in one action); one in the California Superior Court for Santa Clara County; and one in the Delaware Chancery Court.

The plaintiffs in the derivative actions have asserted claims for violations of Sections 10(b) (including Rule 10b-5 thereunder), 14(a), and 20(a) of the Securities Exchange Act of 1934, unjust enrichment, breach of fiduciary duty and aiding and abetting such breach, negligence, misappropriation of information, abuse of control, gross mismanagement, waste of corporate assets, breach of contract, constructive fraud, rescission, and violations of California Corporations Code section 25402, as well as a claim for an accounting of all stock option grants made to the named defendants. KLA-Tencor is named as a nominal defendant in these actions. On behalf of KLA-Tencor, the plaintiffs seek unspecified monetary and other relief against the named defendants. The plaintiffs are James Ziolkowski, Mark Ziering, Alaska Electrical Pension Fund, Jeffrey Rabin and Benjamin Langford. The individual named defendants are current directors and officers Edward W. Barnholt, H. Raymond Bingham, Robert T. Bond, Jeffrey L. Hall, Stephen P. Kaufman, John H. Kispert, Lida Urbaneck and Richard P. Wallace; and former directors and officers Robert J. Boehlke, Leo Chamberlain, Gary E. Dickerson, Richard J. Elkus, Jr., Dennis J. Fortino, Kenneth Levy, Michael E. Marks, Stuart J. Nichols, Arthur P. Schnitzer, Kenneth L. Schroeder and Jon D. Tompkins. Current director David C. Wang and former director Dean O. Morton were originally named as defendants in one of the derivative actions filed in the U.S. District Court for the Northern District of California, but were dropped as named defendants as of December 22, 2006 upon the filing of a consolidated complaint in that action.

The derivative actions are at an early stage. The defendants are not yet required to respond to the complaints in the actions pending in California, and the defendants have moved to dismiss or stay the action pending in Delaware. The Company's Board of Directors has appointed a Special Litigation Committee ("SLC") composed solely of independent directors to conduct an independent investigation of the claims asserted in the derivative actions and to determine the Company's position with respect to those claims. The SLC's investigation is in progress. The Company cannot predict whether these actions are likely to result in any material recovery by or expense to KLA-Tencor.

Shareholder Class Action Litigation Relating to Historical Stock Option Practices. KLA-Tencor and various of its current and former directors and officers were named as defendants in a putative securities class action filed on June 29, 2006

Table of Contents

in the U.S. District Court for the Northern District of California. Two similar actions were filed later in the same court, and all three cases have been consolidated into one action (the “Northern District Litigation”). The consolidated complaint alleges claims under Section 10(b) and Rule 10b-5 thereunder, Section 14(a), Section 20(a), and Section 20A of the Securities Exchange Act of 1934 as a result of the Company’s past stock option grants and related accounting and reporting, and seek unspecified monetary damages and other relief. The plaintiffs seek to represent a class consisting of purchasers of KLA-Tencor stock between June 30, 2001 and May 22, 2006 who allegedly suffered losses as a result of material misrepresentations in KLA-Tencor’s SEC filings and public statements during that period. The lead plaintiffs, who seek to represent the class, are the Police and Fire Retirement System of the City of Detroit, the Louisiana Municipal Police Employees’ Retirement System, and the City of Philadelphia Board of Pensions and Retirement. The defendants are KLA-Tencor, Edward W. Barnholt, H. Raymond Bingham, Robert T. Bond, Gary E. Dickerson, Richard J. Elkus, Jr., Jeffrey L. Hall, Stephen P. Kaufman, John H. Kispert, Kenneth Levy, Michael E. Marks, Stuart J. Nichols, Kenneth L. Schroeder, Jon D. Tompkins, Lida Urbaneck and Richard P. Wallace. This litigation is at an early stage. Discovery has not commenced, and the court has not yet determined whether the plaintiffs may sue on behalf of any class of purchasers. The Company and all other defendants filed motions to dismiss these cases in June 2007, which are now pending before the Court. However, the Company’s motions to dismiss have been taken off calendar due to the agreement in principle between the Company and plaintiffs to settle the litigation, as described below.

In December 2007, the Company reached an agreement in principle for the settlement of the Northern District Litigation. Under the terms of a memorandum of understanding entered into in January 2008 confirming such agreement in principle, the Company will be required to make a payment of \$65.0 million to the settlement class. The settlement, which is subject to a final agreement and court approval, will provide a full release of KLA-Tencor and the other named defendants in connection with the allegation raised in the lawsuit. Accordingly, as the liability had been incurred at December 31, 2007 and it can be reasonably estimated, an amount of \$65.0 million has been accrued by a charge to SG&A expenses during the three months ended December 31, 2007.

As part of a derivative lawsuit filed in the Delaware Chancery Court on July 21, 2006 (described above), a plaintiff claiming to be a KLA-Tencor shareholder also asserted a separate putative class action claim against the Company and certain of its current and former directors and officers alleging that shareholders incurred damage due to purported dilution of KLA-Tencor common stock resulting from historical stock option granting practices. The Company has moved to dismiss this claim.

Another plaintiff, Chris Crimi, filed a putative class action complaint in the Superior Court of the State of California for the County of Santa Clara on September 4, 2007 against the Company and certain of its current and former directors and officers. The plaintiff seeks to represent a class consisting of persons who held KLA-Tencor common stock between September 20, 2002 and September 27, 2006, alleges causes of action for breach of fiduciary duty and rescission based on alleged misstatements and omissions in the Company’s SEC filings concerning the Company’s past stock option grants, and seeks unspecified damages based upon purported dilution of the Company’s stock, injunctive relief, and rescission. The named defendants, in addition to the Company, are Edward W. Barnholt, H. Raymond Bingham, Robert T. Bond, Richard J. Elkus, Jr., Stephen P. Kaufman, Kenneth Levy, Michael E. Marks, Dean O. Morton, Kenneth L. Schroeder, Jon D. Tompkins, and Richard P. Wallace. This litigation is at an early stage, and discovery has not yet begun. The Company has filed a motion to stay the case pending the resolution of other option-related litigation, as well as a demurrer asking the court to dismiss the case on the ground that the claims have no merit. The Company intends to vigorously defend this litigation.

The Company cannot predict the outcome of the shareholder class action cases (described above), and it cannot estimate the likelihood or potential dollar amount of any adverse results, other than the Northern District Litigation. However, an unfavorable outcome in any of these cases could have a material adverse impact upon the financial position, results of operations or cash flows for the period in which the outcome occurs and in future periods.

Indemnification Obligations. Subject to certain limitations, the Company is obligated to indemnify its current and former directors, officers and employees in connection with the investigation of the Company’s historical stock option practices and the related litigation and ongoing government inquiries. These obligations arise under the terms of the Company’s certificate of incorporation, its bylaws, applicable contracts, and Delaware and California law. The obligation to indemnify generally means that the Company is required to pay or reimburse the individuals’ reasonable legal expenses and possibly damages and other liabilities incurred in connection with these matters. The Company is currently paying or reimbursing legal expenses being incurred in connection with these matters by a number of its current and former directors, officers and employees. Although the maximum potential amount of future payments KLA-Tencor could be required to make under these agreements is theoretically unlimited, the Company believes the fair value of this liability, to the extent estimable, is appropriately considered within the reserve it has established for currently pending legal proceedings.

Other Legal Matters. The Company is named from time to time as a party to lawsuits in the normal course of its business. Litigation, in general, and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of legal proceedings are difficult to predict, and the costs incurred in litigation can be substantial, regardless of outcome.

Table of Contents

NOTE 11 – COMMITMENTS AND CONTINGENCIES

Factoring. KLA-Tencor has agreements with financial institutions to sell certain of its trade receivables and promissory notes from customers without recourse. KLA-Tencor does not believe it is at risk for any material losses as a result of these agreements. In addition, from time to time KLA-Tencor will discount, without recourse, Letters of Credit (“LCs”) received from customers in payment for goods.

The following table shows total receivables sold under factoring agreements and proceeds from sales of LCs and related discounting fees paid for the three and six months ended December 31, 2007 and 2006:

(In thousands)	Three months ended		Six months ended	
	December 31, 2007	December 31, 2006	December 31, 2007	December 31, 2006
Receivables sold under factoring agreements	\$ 84,879	\$ 64,776	\$ 155,413	\$ 144,604
Proceeds from sales of LCs	\$ 10,710	\$ 8,523	\$ 17,528	\$ 38,712
Discounting fees paid on sales of LCs (1)	\$ 56	\$ 133	\$ 77	\$ 498

(1) Discounting fees were equivalent to interest expense and were recorded in interest income and other, net.

Facilities. KLA-Tencor leases certain of its facilities under operating leases, which qualify for operating lease accounting treatment under SFAS No. 13, *Accounting for Leases* and, as such, these facilities are not included on its Condensed Consolidated Balance Sheet. Rent expense was approximately \$3.0 million and \$2.7 million for the three months ended December 31, 2007 and 2006, respectively. Rent expense was approximately \$6.0 million and \$4.6 million for the six months ended December 31, 2007 and 2006, respectively.

The following is a schedule of operating lease payments (in thousands):

Fiscal year ending June 30,	Amount
2008 (remaining 6 months)	\$ 5,425
2009	8,650
2010	5,962
2011	3,995
2012	2,518
2013 and thereafter	9,812
Total minimum lease payments	<u>\$ 36,362</u>

Purchase Commitments. KLA-Tencor maintains certain open inventory purchase commitments with its suppliers to ensure a smooth and continuous supply for key components. KLA-Tencor’s liability under these purchase commitments is generally restricted to a forecasted time-horizon as mutually agreed upon between the parties. This forecasted time-horizon can vary among different suppliers. The Company’s open inventory purchase commitments were approximately \$174.8 million as of December 31, 2007 and are primarily due within the next 12 months. Actual expenditures will vary based upon the volume of the transactions and length of contractual service provided. In addition, the amounts paid under these arrangements may change in the event that the arrangements are renegotiated or canceled. Certain agreements provide for potential cancellation penalties.

Guarantees. KLA-Tencor provides standard warranty coverage on its systems for twelve months, providing labor and parts necessary to repair the systems during the warranty period. KLA-Tencor accounts for the estimated warranty cost as a charge to cost of revenues when revenue is recognized. The estimated warranty cost is based on historical product performance and field expenses. Utilizing actual service records, KLA-Tencor calculates the average service hours and parts expense per system and applies the actual labor and overhead rates to determine the estimated warranty charge. KLA-Tencor updates these estimated charges periodically. The actual product performance and/or field expense profiles may differ, and in those cases KLA-Tencor adjusts warranty accruals accordingly.

Table of Contents

The following table provides the changes in the product warranty accrual for the three and six months ended December 31, 2007 and 2006:

(In thousands)	Three months ended December 31,		Six months ended December 31,	
	2007	2006	2007	2006
Beginning balance	\$ 51,278	\$ 46,983	\$ 52,838	\$ 45,642
Accruals for warranties issued during the period	10,613	14,695	25,458	28,949
Changes in liability related to pre-existing warranties	(1,369)	(2,320)	(1,865)	(4,790)
Settlements made during the period	(13,694)	(10,968)	(29,603)	(21,411)
Ending balance	<u>\$ 46,828</u>	<u>\$ 48,390</u>	<u>\$ 46,828</u>	<u>\$ 48,390</u>

Subject to certain limitations, KLA-Tencor indemnifies its current and former officers and directors for certain events or occurrences. Although the maximum potential amount of future payments KLA-Tencor could be required to make under these agreements is theoretically unlimited, the Company believes the fair value of this liability, to the extent estimable, is appropriately considered within the reserve it has established for currently pending legal proceedings.

KLA-Tencor is a party to a variety of agreements pursuant to which it may be obligated to indemnify the other party with respect to certain matters. Typically, these obligations arise in connection with contracts and license agreements or the sale of assets, under which the Company customarily agrees to hold the other party harmless against losses arising from a breach of warranties, representations and covenants related to such matters as title to assets sold, validity of certain intellectual property rights, non-infringement of third-party rights, and certain income tax-related matters. In each of these circumstances, payment by the Company is typically subject to the other party making a claim to and cooperating with the Company pursuant to the procedures specified in the particular contract. This usually allows the Company to challenge the other party's claims or, in case of breach of intellectual property representations or covenants, to control the defense or settlement of any third-party claims brought against the other party. Further, the Company's obligations under these agreements may be limited in terms of amounts, activity (typically at the Company's option to replace or correct the products or terminate the agreement with a refund to the other party), and duration. In some instances, the Company may have recourse against third parties and/or insurance covering certain payments made by the Company.

It is not possible to predict the maximum potential amount of future payments under these or similar agreements due to the conditional nature of the Company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the Company under these agreements have not had a material effect on its business, financial condition, results of operations or cash flows.

The Company maintains guarantee arrangements of \$30.2 million in various locations to fund customs guarantees for VAT and letter of credit needs of its subsidiaries in Europe and Asia. Approximately \$20.5 million was outstanding under these arrangements as of December 31, 2007.

NOTE 12 – DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

KLA-Tencor's foreign subsidiaries operate and sell KLA-Tencor's products in various global markets. As a result, KLA-Tencor is exposed to changes in foreign currency exchange rates. KLA-Tencor utilizes foreign currency forward exchange contracts and options to hedge against future movements in foreign exchange rates that affect certain existing and forecasted foreign currency denominated sales and purchase transactions. KLA-Tencor does not use derivative financial instruments for speculative or trading purposes.

The outstanding hedge contracts, with maximum maturity of 13 months, as of December 31, 2007 and June 30, 2007 were as follows:

(In thousands)	As of December 31, 2007	As of June 30, 2007
Cash flow hedge contracts		
Purchase	\$ 5,796	\$ 4,651
Sell	(248,387)	(242,942)
Other foreign currency hedge contracts		
Purchase	188,335	126,992
Sell	(325,413)	(265,378)
Net outstanding hedge contracts	<u>\$ (379,669)</u>	<u>\$ (376,677)</u>

NOTE 13—SALE AND IMPAIRMENT OF REAL ESTATE ASSETS

During the fiscal year ended June 30, 2007, as part of the Company's long-term business plan, the Company decided to sell certain real estate properties owned by the Company in San Jose, California and Livermore, California. Based on the valuation of these assets using relevant market indicators such as range of estimated selling prices, the Company recorded an asset impairment charge of approximately \$56.8 million, which was included in SG&A expenses during the fiscal year ended June 30, 2007.

During the three months ended December 31, 2007, the Company completed the sale of real estate properties in Livermore, California and recognized a gain of \$9.0 million as an offset to SG&A expenses. In addition, during the three months ended December 31, 2007, the Company entered into an agreement to sell certain real estate located in San Jose, California. The sale is expected to be completed in the second half of fiscal year 2008. Accordingly, these assets with a net book value of \$14.0 million have been held for sale at December 31, 2007.

NOTE 14 – RELATED PARTY TRANSACTIONS

During the three months ended December 31, 2007 or 2006, or both, the Company purchased from, or sold to, JDS Uniphase Corporation, Freescale Semiconductor, Inc., National Semiconductor Corp., STMicroelectronics, NV and Oracle Corporation, at the time when one or more members of the Company's Board of Directors also served as an executive officer or board member of the other party.

For the three months ended December 31, 2007 and 2006, the Company's total revenues from transactions with these parties from the period that they were considered related were approximately \$9 million and \$10 million, respectively. For the six months ended December 31, 2007 and 2006, the Company's total revenues from transactions with these parties from the period that they were considered related were approximately \$21 million and \$12 million, respectively.

In addition, for the three months ended December 31, 2007 and 2006 the Company's total purchases from transactions with these parties from the period that they were considered related were approximately \$2 million and \$0.2 million, respectively. For the six months ended December 31, 2007 and 2006 the Company's total purchases from transactions with these parties from the period that they were considered related were approximately \$4 million and \$4 million, respectively.

The Company had a receivable balance from these parties of approximately \$7 million at both December 31, 2007 and June 30, 2007. Management believes that such transactions are at arms length and on similar terms as would have been obtained from unaffiliated third parties.

NOTE 15 – SEGMENT REPORTING AND GEOGRAPHIC INFORMATION

KLA-Tencor reports one reportable segment in accordance with the provisions of SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. Operating segments are defined as components of an enterprise about which separate financial information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. KLA-Tencor's chief operating decision makers are its Chief Executive Officer and the Chief Operating Officer.

KLA-Tencor is engaged primarily in designing, manufacturing, and marketing process control and yield management solutions for the semiconductor and related microelectronics industries. All operating units have been aggregated due to their inter-dependencies, commonality of long-term economic characteristics, products and services, the production processes, class of customer and distribution processes. The Company's service products are an extension of the system product portfolio and provide customers with spare parts and fab management services (including system preventive maintenance and optimization services) to improve yield, increase production uptime and throughput, and lower the cost of ownership. Since KLA-Tencor operates in one segment, all financial segment information required by SFAS No. 131 can be found in the condensed consolidated financial statements.

KLA-Tencor's significant operations outside the United States include manufacturing facilities in Israel and Singapore, and sales, marketing and service offices in Western Europe, Japan and the Asia Pacific region. For geographical revenue reporting, revenues are attributed to the geographic location in which the customer is located. Long-lived assets consist primarily of net property and equipment and are attributed to the geographic region in which they are located.

Table of Contents

The following is a summary of revenues by geographic region for the three and six months ended December 31, 2007 and 2006:

(Dollar amounts in thousands)	Three months ended December 31,				Six months ended December 31,			
	2007		2006		2007		2006	
Revenues:								
United States	\$ 90,635	14%	\$ 166,001	26%	\$ 237,587	18%	296,258	23%
Taiwan	168,586	27%	126,312	19%	365,600	28%	263,609	21%
Japan	173,203	27%	134,959	21%	355,414	27%	242,225	19%
Europe & Israel	93,135	15%	51,650	8%	162,913	12%	121,969	9%
Korea	51,473	8%	73,942	11%	85,532	6%	161,257	13%
Asia Pacific	58,751	9%	96,406	15%	121,757	9%	193,315	15%
Total	<u>\$635,783</u>	<u>100%</u>	<u>\$649,270</u>	<u>100%</u>	<u>\$1,328,803</u>	<u>100%</u>	<u>\$1,278,633</u>	<u>100%</u>

Long-lived assets by geographic region as of December 31, 2007 and June 30, 2007 were as follows:

(In thousands)	December 31, 2007	June 30, 2007
Long-lived assets:		
United States	\$ 288,487	\$ 321,146
Taiwan	1,627	1,720
Japan	6,715	6,821
Europe & Israel	10,718	11,466
Korea	6,063	6,524
Asia Pacific	58,028	46,301
Total	<u>\$ 371,638</u>	<u>\$ 393,978</u>

The following is a summary of revenues by major products for the three months ended December 31, 2007 and 2006 (as a percentage of total revenue):

Revenues:	Three months ended December 31,		Six months ended December 31,	
	2007	2006	2007	2006
Defect inspection	60%	59%	59%	61%
Metrology	18%	20%	20%	18%
Service	19%	15%	18%	15%
Other	3%	6%	3%	6%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

In each of the three and six months ended December 31, 2007 and December 31, 2006, no customer accounted for greater than 10% of revenue. As of December 31, 2007, two customers accounted for approximately 10% of net accounts receivable. As of June 30, 2007, no customer accounted for greater than 10% of net accounts receivable.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact may be forward-looking statements. You can identify these and other forward-looking statements by the use of words such as "may," "will," "could," "would," "should," "expects," "plans," "anticipates," "relies," "believes," "estimates," "predicts," "intends," "potential," "continue," or the negative of such terms, or other comparable terminology. Forward-looking statements also include the assumptions underlying or relating to any of the foregoing statements. Such forward-looking statements include, among others, forecasts of the future results of our operations; the percentage of spending that our customers allocate to process control; orders for our products and capital equipment generally; sales of semiconductors; the allocation of capital spending by our customers; growth of revenue in the semiconductor industry, the semiconductor capital equipment industry and our business; technological trends in the semiconductor industry; the future impact of the restatement of our historical financial statements, shareholder litigation and related matters arising from the discovery that we had retroactively priced stock options (primarily from July 1, 1997 to June 30, 2002) and had not accounted for them

Table of Contents

correctly; our future product offerings and product features; the success and market acceptance of new products; timing of shipment of backlog; the future of our product shipments and our product and service revenues; our future gross margins; our future selling, general and administrative expenses; international sales and operations; maintenance of our competitive advantage; success of our product offerings; creation and funding of programs for research and development; attraction and retention of employees; results of our investment in leading edge technologies; the effects of hedging transactions; the effect of the sale of trade receivables and promissory notes from customers; our future income tax rate; dividends; the completion of any acquisitions of third parties, or the technology or assets thereof; benefits received from any acquisitions and development of acquired technologies; sufficiency of our existing cash balance, investments and cash generated from operations to meet our operating and working capital requirements; and the adoption of new accounting pronouncements.

Our actual results may differ significantly from those projected in the forward-looking statements in this report. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in Item 1A, "Risk Factors" of Part II of this report as well as in Item 1, "Business" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended June 30, 2007, filed with the Securities and Exchange Commission on August 20, 2007. You should carefully review these risks and also review the risks described in this document and the other documents we file from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q that we will file during the remainder of the fiscal year ending June 30, 2008. You are cautioned not to place undue reliance on these forward-looking statements, and we expressly assume no obligation to update the forward-looking statements in this report after the date hereof.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

The preparation of our Condensed Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions in applying our accounting policies that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Note 1 of the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended June 30, 2007 describes the significant accounting policies and methods used in preparation of the Consolidated Financial Statements. We based these estimates and assumptions on historical experience, and evaluate them on an on-going basis to ensure that they remain reasonable under current conditions. Actual results could differ from those estimates. We discuss the development and selection of the critical accounting estimates with the Audit Committee of our Board of Directors on a quarterly basis, and the Audit Committee has reviewed our related disclosure in this Quarterly Report on Form 10-Q. The accounting policies that reflect our more significant estimates, judgments and assumptions and which we believe are the most critical to aid in fully understanding and evaluating our reported financial results include the following:

- Revenue Recognition
- Inventories
- Warranty
- Allowance for Doubtful Accounts
- Stock-Based Compensation
- Contingencies and Litigation
- Goodwill and Intangible Assets
- Income Taxes

With the exception of the below paragraph that discusses the impact of Financial Accounting Standards Board ("FASB") Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109* ("FIN 48") on our critical accounting policy and estimates for accounting for income taxes, during the quarter ended December 31, 2007 there were no significant changes in our critical accounting policies and estimates. Please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended June 30, 2007 for a more complete discussion of our critical accounting policies and estimates.

Income Taxes. We account for income taxes in accordance with Statement of Financial Accounting Standards ("SFAS") No. 109 *Accounting for Income Taxes*, which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities. SFAS No. 109 also requires that deferred tax assets be reduced by a valuation allowance if it is more likely than not that a portion of the deferred tax asset will not be realized. We have determined that our future taxable income will be sufficient to recover all of our deferred tax assets. However, should there be a change in our ability to recover our deferred tax assets, we

[Table of Contents](#)

could be required to record a valuation allowance against our deferred tax assets. This would result in an increase to our tax provision in the period in which we determined that the recovery was not probable.

On a quarterly basis, we provide for income taxes based upon an estimated annual effective income tax rate. The effective tax rate is highly dependent upon the geographic composition of worldwide earnings, tax regulations governing each region, availability of tax credits and the effectiveness of our tax planning strategies. We carefully monitor the changes in many factors and adjust our effective income tax rate on a timely basis. If actual results differ from these estimates, this could have a material effect on our financial condition and results of operations.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. As a result of the implementation of FIN 48, we recognize liabilities for uncertain tax positions based on the two-step process prescribed within the interpretation. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

We adopted FIN 48 on July 1, 2007. See Note 9, "Income Taxes" to the Condensed Consolidated Financial Statements for a detailed description.

Effects of Recent Accounting Pronouncements. In December 2007, the FASB issued SFAS No. 141 (Revised 2007), *Business Combinations*. SFAS 141(R) retains the fundamental requirements of the original pronouncement requiring that the purchase method be used for all business combinations. SFAS 141(R) defines the acquirer as the entity that obtains control of one or more businesses in the business combination, establishes the acquisition date as the date that the acquirer achieves control and requires the acquirer to recognize the assets acquired, liabilities assumed and any noncontrolling interest at their fair values as of the acquisition date. In addition, SFAS 141(R) requires expensing of acquisition-related and restructure-related costs, remeasurement of earn out provisions at fair value, measurement of equity securities issued for purchase at the date of close of the transaction and non-expensing of in-process research and development related intangibles. SFAS 141(R) is effective for our business combinations for which the acquisition date is on or after July 1, 2009. We are currently evaluating the impact of the implementation of SFAS No. 141(R) on our consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*. This Statement amends ARB 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. It requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. This Statement establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation. SFAS No. 160 is effective for our fiscal year beginning July 1, 2009. We are currently evaluating the impact of the implementation of SFAS No. 160 on its consolidated financial position, results of operations and cash flows.

In June 2007, the FASB ratified EITF Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities*. This issue provides that nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities should be deferred and capitalized. Such amounts should be recognized as an expense as the related goods are delivered or the related services are performed. EITF Issue No. 07-3 is effective for the Company's fiscal year beginning July 1, 2008. The adoption of EITF Issue No. 07-3 is not expected to have a material impact on our consolidated financial position, results of operations and cash flows.

EXECUTIVE SUMMARY

KLA-Tencor Corporation is the world's leading supplier of process control and yield management solutions for the semiconductor and related microelectronics industries. Within our primary area of focus, our comprehensive portfolio of products, services, software and expertise helps integrated circuit manufacturers manage yield throughout the entire wafer fabrication process – from research and development to final volume production.

Revenues, income from operations, net income, cash flow from operations, and diluted earnings per share are some of the key indicators we use to monitor our financial condition and operating performance. The following table sets forth some of the key quarterly unaudited financial information which we use to manage our business.

Table of Contents

(In thousands, except net income per share -diluted)	Three months ended		Fiscal year 2007			
	December 31, 2007	September 30, 2007	June 30, 2007	March 31, 2007	December 31, 2006	September 30, 2006
Revenues	\$ 635,783	\$ 693,020	\$ 736,388	\$ 716,208	\$ 649,270	\$ 629,363
Income from operations	93,487	177,278	174,864	182,655	78,359	153,990
Net income	83,935	88,158	147,342	154,785	90,049	135,922

Net income per share - diluted	0.45	0.46	0.75	0.76	0.44	0.67

Industry Trends

As a supplier to the global semiconductor and semiconductor-related industries, we are subject to business cycles, the timing, length and volatility of which can be difficult to predict. The industries we serve have historically been cyclical due to sudden changes in demand and manufacturing capacity. We expect our customers' capital spending on process control to increase over the long term. We believe that this increase in process control spending will be driven by the demand for more precise diagnostics capabilities to address multiple new defects as a result of further shrinking of device feature sizes, the transition to new materials, new devices and circuit architecture, new lithography challenges and fab process innovation. We anticipate that these factors will drive increased demand for our products and services over the coming years. The key drivers in the semiconductor equipment industry today are the continued progression of transition to 300mm, ramping up at the 65nm design nodes and increasing adoption of 45nm technology. These drivers are fueled by competitive pressures for our customers to improve yields, lower their costs and get products to market more quickly in order to benefit from the increased demand for products from the consumer electronics, computing and communication industries.

RESULTS OF OPERATIONS

Revenues and Gross Margin

Table of Contents

Product revenues

Product revenues decreased during the second quarter of fiscal year 2008 from the first quarter of fiscal year 2008 as a result of lower backlog of shipped tools awaiting customer acceptance at the beginning of the second quarter of fiscal year 2008, in addition to a lower proportion of tools shipped during the second quarter to customers for whom the tools had previously met the required acceptance criteria.

Product revenues decreased in the second quarter of fiscal year 2008 compared to the corresponding period in fiscal year 2007 due to lower backlog of shipped tools awaiting customer acceptance at the beginning of the second quarter of fiscal year 2008, lower revenue on shipment of tools that have previously met the required acceptance criteria and lower revenues from customer buyouts of tools on consignment.

Product revenues increased during the six months ended December 31, 2007 compared to the six months ended December 31, 2006, primarily as a result of a higher level of backlog of shipped tools awaiting customer acceptance at the beginning of the first and second quarter of fiscal year 2007 reflecting a higher level of customer spending as well as higher revenue recognized on shipment for products for which installation is perfunctory.

In each of the three and six months ended December 31, 2007 and December 31, 2006, no customer accounted for greater than 10% of revenue. As of December 31, 2007, two customers each accounted for more than 10% of net accounts receivable. As of June 30, 2007, no customer accounted for greater than 10% of net accounts receivable.

Service revenues

Service revenues are generated from maintenance service contracts, as well as time and material billable service calls made to our customers after the expiration of the warranty period. Service revenues continued to increase through the periods disclosed in the table above as our installed product base of equipment at our customers' sites continued to grow. The amount of service revenues generated is primarily a function of the number of post-warranty systems installed at our customers' sites and the utilization levels for those systems.

Revenues by region

Revenues by region for the periods indicated were as follows:

(In thousands)	Three months ended					
	December 31, 2007		September 30, 2007		December 31, 2006	
United States	\$ 90,635	14%	\$ 146,953	21%	\$ 166,001	26%
Taiwan	168,586	27%	197,014	29%	126,312	19%
Japan	173,203	27%	182,210	26%	134,959	21%
Europe & Israel	93,135	15%	69,778	10%	51,650	8%
Korea	51,473	8%	34,059	5%	73,942	11%
Asia Pacific	58,751	9%	63,006	9%	96,406	15%
Total	\$ 635,783	100%	\$ 693,020	100%	\$ 649,270	100%

(In thousands)	Six Months Ended			
	December 31, 2007		December 31, 2006	
United States	\$ 237,587	18%	\$ 296,258	23%
Taiwan	\$ 365,600	28%	263,609	21%
Japan	\$ 355,414	27%	242,225	19%
Europe & Israel	\$ 162,913	12%	121,969	9%
Korea	\$ 85,532	6%	161,257	13%
Asia Pacific	\$ 121,757	9%	193,315	15%
Total	\$1,328,803	100%	\$1,278,633	100%

Table of Contents

A significant portion of our revenues continues to be generated outside of the United States because a substantial portion of the world's semiconductor manufacturing capacity is located, and the majority of new fabs are being built, in regions other than the United States, and we expect that will continue to be the case.

Gross margin

Our gross margin fluctuates with revenue levels and product mix, and is affected by variations in costs related to manufacturing and servicing our products. The decrease in gross margin during the second quarter of fiscal year 2008 compared to the first quarter of fiscal year 2008 was due to write down of inventory on discontinued products of \$3.1 million and impairment of certain intangibles related to those discontinued products of \$6.2 million recorded in the second quarter of fiscal year 2008. These charges were partially offset by gross margin improvements on other products.

Our gross margin was higher during the second quarter of fiscal year 2008 compared to the corresponding period of fiscal year 2007 due to savings realized from our cost reduction strategies, offset by an inventory write down of \$3.1 million related to discontinued products recorded in the second quarter of fiscal year 2008. Also, the following other charges were recorded in the second quarter of fiscal year 2007 compared to the second quarter of fiscal year 2008:

- \$9.9 million for amortization and impairment of intangibles and fair value adjustment for inventory related to acquisitions, compared to \$12.2 million in the second quarter of fiscal 2008,
- \$2.8 million for severance and benefits related to employee workforce reduction, compared to \$1.2 million in the second quarter of fiscal year 2008 and
- \$2.9 million for reimbursement of taxes to employees, including management, related to IRC Section 409A and cash payments to employees to compensate them for lost benefits resulting from the suspension of our ESPP during fiscal year 2007, compared to no charges for such reimbursements and payments during the second quarter of fiscal year 2008.

Our gross margin during the six months ended December 31, 2007 was relatively flat compared to gross margin for the corresponding period of fiscal year 2007. The following charges were recorded in the six months ended December 31, 2006 compared to the six months ended December 31, 2007:

- \$10.2 million for amortization and impairment of intangibles and fair value adjustment for inventory related to acquisitions, compared to \$22.2 million in the six months ended December 31, 2007,
- \$2.8 million for severance and benefits related to employee workforce reduction, compared to \$2.0 million in the six months ended December 31, 2007,
- \$2.9 million for reimbursement of taxes to employees, including management, related to IRC Section 409A and cash payments to employees to compensate them for lost benefits resulting from the suspension of our ESPP during fiscal year 2007, compared to no charges for such reimbursements and payments during the six months ended December 31, 2007, and
- No charges recorded for inventory write downs related to discontinued products in the six months ended December 31, 2006, compared to a \$3.1 million charge recorded in the six months ended December 31, 2007.

Engineering, Research and Development ("R&D")

(Dollar amounts in thousands)	Three months ended				
	December 31, 2007	September 30, 2007	December 31, 2006	Q2 FY08 vs. Q1 FY08	Q2 FY08 vs. Q2 FY07

Stock-based compensation expense included in R&D expenses	\$ 7,109	\$ 8,592	\$ 11,243	\$(1,483) -17%	\$ (4,134) -37%
R&D expenses as a percentage of total revenues	15%	14%	17%		

(Dollar amounts in thousands)	Six months ended		
	December 31, 2007	December 31, 2006	Q2 FY08 vs. Q2 FY07
R&D expenses	\$ 196,857	\$ 207,394	\$(10,537) -5%
Stock-based compensation expense included in R&D expenses	\$ 15,701	\$ 22,948	\$ (7,247) -32%
R&D expenses as a percentage of total revenues	15%	16%	

Table of Contents

R&D expenses during the second quarter of fiscal year 2008 were flat compared to the first quarter of fiscal 2008.

The decrease in R&D expenses during the second quarter of fiscal year 2008 compared to the corresponding period in fiscal year 2007 was primarily due to one-time charges recorded during the second quarter of fiscal year 2007 related to employee severance payments as well as benefits and reimbursements related to IRC Section 409A and our ESPP. The following charges were recorded during the second quarter of fiscal year 2007 compared to the second quarter of fiscal year 2008:

- \$3.2 million for in-process research and development charges and amortization of intangibles associated with acquisitions, compared to \$4.2 million in the second quarter of fiscal year 2008,
- \$2.1 million for severance and benefits related to an employee workforce reduction, compared to \$0.4 million in the second quarter of fiscal year 2008, and
- \$3.4 million for reimbursement of taxes to employees, including management, related to IRC Section 409A and cash payments to employees to compensate them for lost benefits resulting from the suspension of our ESPP during fiscal year 2007, compared to no charges for such reimbursements and payments during the second quarter of fiscal year 2008.

The decrease in R&D expenses during the six months ended December 31, 2007 compared to the six months ended December 31, 2006 was primarily due to one-time charges recorded during the second quarter of fiscal year 2007 related to employee severance payments as well as benefits and reimbursements related to IRC Section 409A and our ESPP. The following charges were recorded during the six months ended December 31, 2006 compared to the six months ended December 31, 2007:

- \$3.6 million for in-process research and development charges and amortization of intangibles associated with acquisitions, compared to \$4.4 million during the six months ended December 31, 2007,
- \$2.1 million for severance and benefits related to an employee workforce reduction, compared to \$0.5 million during the six months ended December 31, 2007, and
- \$3.4 million for reimbursement of taxes to employees, including management, related to IRC Section 409A and cash payments to employees to compensate them for lost benefits resulting from the suspension of our ESPP during the six months ended December 31, 2006, compared to no charges for such reimbursements and payments during the six months ended December 31, 2007.

In addition, stock-based compensation expense recorded in R&D expenses was lower in the three and six months ended December 31, 2007 compared to the six months ended December 31, 2006 primarily due to certain option grants in prior years that fully vested in the fiscal year ended June 30, 2007.

During the fiscal year ended June 30, 2007, we recorded \$16.6 million for in-process research and development (“IPR&D”) charges primarily related to the acquisition of a development stage company. The fair value of the purchased IPR&D was determined using the income approach, which discounts expected future cash flows from projects to their net present value. Future cash flows were estimated, taking into account the expected life cycles of the products and the underlying technology, relevant market sizes and industry trends. We determined a discount rate for each project based on the relative risks inherent in the project’s development horizon, the estimated costs of development, and the level of technological change in the project and the industry, among other factors. IPR&D was expensed upon acquisition because technological feasibility had not been achieved and no future alternative uses existed. As of December 31, 2007, there have been no material changes from the underlying assumptions that were used in the original computation of the value of the acquired IPR&D.

R&D expenses include the benefit of \$4.0 million, \$4.1 million and \$4.1 million of external funding received during the three months ended December 31, 2007, September 30, 2007 and December 31, 2006, respectively, for certain strategic development programs from government grants.

Our future operating results will depend significantly on our ability to produce products and provide services that have a competitive advantage in our marketplace. To do this, we believe that we must continue to make substantial investments in our research and development. We remain committed to product development in new and emerging technologies as we address the yield challenges our customers face at future technology nodes.

Table of Contents

Selling, General and Administrative (“SG&A”)

(Dollar amounts in thousands)	Three months ended				
	December 31, 2007	September 30, 2007	December 31, 2006	Q2 FY08 vs. Q1 FY08	Q2 FY08 vs. Q2 FY07
SG&A expenses	\$ 159,778	\$ 110,505	\$ 165,038	\$49,273 45%	\$ (5,260) -3%
Stock-based compensation expense included in SG&A expenses	\$ 11,443	\$ 13,238	\$ (3,177)	\$ (1,795) -14%	\$ (14,620) 460%
SG&A expenses as a percentage of total revenues	25%	16%	25%		

(Dollar amounts in thousands)	Six months ended			
	December 31, 2007	December 31, 2006	Q2 FY08 vs. Q2 FY07	
SG&A expenses	\$ 270,283	\$ 270,999	\$ (716)	0%
Stock-based compensation expense included in SG&A expenses	\$ 24,681	\$ 13,578	\$ (11,103)	-82%
SG&A expenses as a percentage of total revenues	20%	21%		

SG&A expenses increased during the second quarter of fiscal year 2008 compared to the first quarter of fiscal year 2008 due to a charge of \$67.0 million to cover the \$65.0 million amount that we anticipate expending in order to resolve the pending shareholder class action litigation relating to the Company’s historical stock option practices, as described in Note 10, “Litigation and Other Legal Matters,” plus related litigation expenses. Such charge was offset by a gain on the sale of certain real estate assets of \$9.0 million in the second quarter of fiscal year 2008 in addition to savings realized from our cost reduction strategies.

SG&A expenses decreased during the second quarter of fiscal year 2008 compared to the corresponding period in fiscal year 2007 due to lower compensation costs attributable to cost saving strategies and lower stock-based compensation expense (prior to the impact of the reversal of \$20.3 million in stock-based compensation expense related to our former Chief Executive Officer) due to certain option grants in prior years that were fully vested in the fiscal year ended June 30, 2007. The one-time charges recorded in the second quarter of fiscal year 2008 were substantially offset by the one-time charges recorded in the corresponding period in fiscal year 2007. The following charges were recorded in the second quarter of fiscal year 2007 compared to the second quarter of fiscal year 2008:

- \$56.8 million for impairment charges related to the write down of buildings, compared to a gain on sale of certain real estate assets of \$9.0 million in the second quarter of fiscal year 2008,
- \$5.0 million for amortization of intangibles associated with acquisitions, compared to \$2.4 million recorded in the second quarter of fiscal year 2008,
- \$5.5 million for severance and benefits related to an employee workforce reduction, compared to \$1.4 million recorded in the second quarter of fiscal year 2008,
- \$4.5 million for reimbursement of taxes to employees, including management, related to IRC Section 409A and cash payments to employees to compensate them for lost benefits resulting from the suspension of our ESPP during fiscal year 2007, compared to no charges for such reimbursements and payments during the second quarter of fiscal year 2008, and
- \$4.6 million for litigation expenses related to the Company’s historical stock option practices, compared to \$67.0 million recorded in the second quarter of fiscal year 2008 to cover the \$65.0 million amount that we anticipate expending in order to resolve the pending shareholder class action litigation relating to historical stock option practices, as described in Note 10, “Litigation and Other Legal Matters,” plus related litigation expenses.

The above charges were offset by a reversal of \$20.3 million in the second quarter of fiscal year 2007 of previously recorded stock-based compensation expense related to our former Chief Executive Officer.

SG&A expenses for the six months ended December 31, 2007 compared to the six months ended December 31, 2006 were relatively flat. The cost savings due to cost reduction strategies were offset by higher one-time charges recorded during the six months ended December 31, 2007. The following charges were recorded in the six months ended December 31, 2006 compared to the six months ended December 31, 2007:

- \$56.8 million for impairment charges related to the write down of buildings, compared to a gain on sale of certain real estate assets of \$9.0 million in the second quarter of fiscal year 2008,

Table of Contents

- \$5.1 million for amortization of intangibles associated with acquisitions, compared to \$4.6 million recorded in the six months ended December 31, 2007,
- \$5.5 million for severance and benefits related to an employee workforce reduction, compared to \$2.8 million recorded during the six months ended December 31, 2007,
- \$4.5 million for reimbursement of taxes to employees, including management, related to IRC Section 409A and cash payments to employees to compensate them for lost benefits resulting from the suspension of our ESPP during fiscal year 2007, compared to no charges for such reimbursements and payments during the six months ended December 31, 2007, and
- \$7.1 million for litigation expenses related to the Company's historical stock option practices, compared to \$69.1 million recorded in the second quarter of fiscal year 2008 to cover the \$65.0 million amount that we anticipate expending order to resolve the pending shareholder class action litigation relating to historical stock option practices, as described in Note 10, "Litigation and Other Legal Matters," plus related litigation expenses.

On October 16, 2006, we terminated all aspects of Mr. Schroeder's employment relationship and agreement with us. In connection with the cancellation of certain equity awards held by Mr. Schroeder at the time of termination, in the second quarter of fiscal 2007 we reversed \$20.3 million of the non-cash, stock-based compensation charges that had been recorded in prior periods related to unvested option shares and restricted stock award shares. See Note 5, "Stock-Based Compensation" to the Condensed Consolidated Financial Statements for more information.

During the second quarter of fiscal year 2007, as part of the long-term business plan, we decided to sell certain real estate properties owned by us in San Jose, California and Livermore, California. Based on the valuation of these assets, performed by a third party appraiser, we recorded an asset impairment charge of approximately \$56.8 million, which was included in SG&A in the three months ended December 31, 2006. The real estate properties owned by us in Livermore were sold in the second quarter of fiscal year 2008, and a gain of \$9.0 million was recognized in SG&A expenses.

Interest Income and Other, Net

(Dollar amounts in thousands)	Three months ended		
	December 31, 2007	September 30, 2007	December 31, 2006
Interest income and other, net	\$ 13,269	\$ 17,474	\$ 22,657
Percentage of total revenues	2%	3%	3%

(Dollar amounts in thousands)	Six months ended	
	December 31, 2007	December 31, 2006
Interest income and other, net	\$ 30,743	\$ 45,114
Percentage of total revenues	2%	4%

Interest income and other, net is comprised primarily of interest income earned on our investment and cash portfolio, realized gains or losses on sales of marketable securities, as well as gains or losses from our net foreign currency hedging activities. The decrease in interest income and other, net was primarily due to lower levels of cash as a result of share repurchases in the first quarter and second quarter of fiscal year 2008 of \$683.5 million and \$133.6 million, respectively.

Provision for Income Taxes

Our effective income tax rate was 21.4% and 11.5% for the three months ended December 31, 2007 and December 31, 2006, respectively, and 42.9% and 19.1% for the six months ended December 31, 2007 and December 31, 2006, respectively.

Table of Contents

The increase in the effective tax rate from for the three months ended December 31, 2007 compared to the three months ended December 31, 2006 is primarily due to the reduction in the effective tax rate from the retroactive reinstatement of the federal research and development tax credit and non-recurring items for which the tax effects were recognized in the three months ended December 31, 2006. The non-recurring items included asset impairment charges and compensation expense related to reimbursing employees for tax liabilities related IRC Section 409A. In addition, there was an increase to the effective tax rate for the three months ended December 31, 2007 due to decreases in the tax benefits related to tax exempt interest, research and development credit and extraterritorial income exclusion and a decrease in the effective tax rate from the reduction of tax expense in connection with the expense to settle the shareholder class action lawsuit.

The increase in the effective tax rate for the six months ended December 31, 2007 compared to the six months ended December 31, 2006 is primarily due to the impact of \$46.6 million of incremental U.S. tax expense associated with the implementation of our global manufacturing strategy for the three months ended September 30, 2007. In addition, there was an increase to the effective tax rate for the six months ended December 31, 2007 compared to the six months ended December 31, 2006 due to decreases in the tax benefits related to tax exempt interest, research and development credit and extraterritorial income exclusion and a decrease in the effective tax rate from the reduction of tax expense in connection with the expense to settle the shareholder class action lawsuit.

We expect the tax rate in future periods of the year ending June 30, 2008 to result in an annual rate of approximately 37% which includes the effect of the higher tax expense associated with the implementation of our global manufacturing strategy.

Our future effective income tax rate depends on various factors, such as tax legislation, the geographic composition of our pre-tax income, non tax-deductible expenses incurred in connection with acquisitions, amounts of tax-exempt interest income and research and development credits as a percentage of aggregate pre-tax income, and the effectiveness of our tax planning strategies.

Equity Incentive Program

Our equity incentive program is a broad-based, long-term retention program that is intended to attract and retain key employees, and align stockholder and employee interests. The equity incentive program consists of two plans: one under which non-employee directors may be granted options to purchase shares of our stock, and another in which non-employee directors, officers, key employees, consultants and all other employees may be granted options to purchase shares of our stock, restricted stock units and other types of equity awards. For the past several years until June 30, 2006, stock options were generally granted at the market price of our common stock on the date of grant, with a vesting period of five years and an exercise period not to exceed seven years (ten years for options granted prior to July 1, 2005) from the date of issuance. Restricted stock units may be granted with varying criteria such as time-based or performance-based vesting. Substantially all of our employees that meet established performance goals and qualify as key employees participate in our main equity incentive plan. Since July 1, 2006, we have granted only restricted stock units under our equity incentive program, except for options granted to non-employee directors, which were part of their regular compensation package for service through the end of the first quarter of fiscal year 2008 but are no longer a component thereof.

Selling, general and administrative	11,443	(3,177)	24,681	13,578
Total stock-based compensation	<u>\$ 23,252</u>	<u>\$ 16,068</u>	<u>\$ 51,335</u>	<u>\$ 53,115</u>

Stock-based compensation expense decreased during the six months ended December 31, 2007 compared to three months ended December 31, 2006 primarily due to a reversal of \$20.3 million in stock based compensation expense related to our former Chief Executive Officer recorded during the three months ended December 31, 2006. The decrease is also due to certain option grants in prior years that fully vested in the fiscal year ended June 30, 2007.

[Table of Contents](#)

LIQUIDITY AND CAPITAL RESOURCES

<u>(Dollar amounts in thousands)</u>	<u>December 31, 2007</u>	<u>June 30, 2007</u>
Cash and cash equivalents	\$ 547,643	\$ 722,511
Marketable securities	749,561	988,118
Total cash, cash equivalents and marketable securities	<u>\$ 1,297,204</u>	<u>\$ 1,710,629</u>
Percentage of total assets	31%	37%

<u>(In thousands)</u>	<u>Six months ended</u>	
	<u>December 31, 2007</u>	<u>December 31, 2006</u>
Cash provided by operating activities	\$ 331,589	\$ 256,608
Cash provided by (used in) investing activities	233,739	(501,765)
Cash used in financing activities	(733,838)	(28,482)
Effect of exchange rate changes on cash and cash equivalents	(6,358)	7,832
Net decrease in cash and cash equivalents	<u>\$ (174,868)</u>	<u>\$ (265,807)</u>

We have historically financed our operations through cash generated from operations. Cash provided by operating activities was \$331.6 million and \$256.6 million for the six months ended December 31, 2007 and 2006, respectively. Cash provided by operating activities during the six months ended December 31, 2007 consisted primarily of net income of \$172.1 million, increased by non-cash depreciation and amortization of \$53.3 million, stock-based compensation of \$51.3 million, a decrease in inventories of \$57.5 million due to lower build plan as a result of lower bookings, a decrease in accounts receivable of \$30.2 million as collections exceeded shipments during the six months ended December 31, 2007 and an increase in accounts payable of \$21.8 million primarily as a result of timing of payments. These increases in operating cash flow were partially offset by changes in other assets and liabilities of \$47.2 million primarily due to net cash outflow resulting from tax payments made and an accrual of \$65.0 million for the proposed settlement of the shareholder class action lawsuit made in the six months ended December 31, 2007.

Cash provided by operating activities during the six months ended December 31, 2006 consisted primarily of net income of \$226.0 million increased by non-cash depreciation and amortization of \$43.8 million, non-cash impairment charges of \$56.8 million, and stock-based compensation of \$53.1 million, offset by an increase in inventories of \$68.9 million and changes in other assets and liabilities of \$66.4 million.

Investing activities typically consist of purchases and sales or maturities of marketable securities, purchases of capital assets to support long-term growth and acquisitions of technology or other companies to allow access to new markets or emerging technologies. Cash provided by investing activities was \$233.7 million during the six months ended December 31, 2007, while cash used in investing activities was \$501.8 million during the six months ended December 31, 2006.

Financing activities include dividend payments to our common stockholders and sales and repurchases of our common stock. Since the inception of the repurchase program in 1997 through December 31, 2007, the Board of Directors has authorized us to repurchase a total of 47.8 million shares. We used \$809.8 million in the six months ended December 31, 2007, and accrued an additional \$7.3 million at December 31, 2007, in connection with the repurchase of 14.4 million shares of our common stock. Because the stock repurchase program was suspended in May 2006 and resumed in February 2007, we did not repurchase stock in the six months ended December 31, 2006. The decrease in cash, cash equivalents and marketable securities from the six months ended December 31, 2006 to the six months ended December 31, 2007 was primarily due to the repurchase of shares in the first six months of fiscal year 2008.

During the third quarter of the fiscal year ended June 30, 2005, our Board of Directors approved the initiation of a quarterly cash dividend. During the three months ended December 31, 2007, our Board of Directors authorized a quarterly cash dividend of \$0.15 per share, which was paid on December 3, 2007 to stockholders of record at the close of business on November 19, 2007. During the same period in fiscal year 2007, we declared and paid a quarterly cash dividend of \$0.12 per share. The total amount of dividends paid during the three months ended December 31, 2007 and 2006 was \$27.2 million and \$24.2 million, respectively.

Table of Contents

The following is a schedule summarizing our significant obligations to make future payments under contractual obligations as of December 31, 2007:

(in thousands)	Total	2008 ⁽¹⁾	2009	2010	2011	2012	Thereafter
Purchase commitments	\$ 174,789	\$ 153,133	\$ 21,656	\$ —	\$ —	\$ —	\$ —
Litigation settlement	65,000	65,000					
Operating leases	36,362	5,425	8,650	5,962	3,995	2,518	9,812
Pension obligations	9,955	432	924	976	1,001	902	5,720
Other obligations	21,694	21,694	—	—	—	—	—
Total contractual cash obligations	\$ 307,800	\$ 245,684	\$ 31,230	\$ 6,938	\$ 4,996	\$ 3,420	\$ 15,532

(1) Remaining 6 months

We have agreements with financial institutions to sell certain of our trade receivables and promissory notes from customers without recourse. In addition, from time to time we will discount, without recourse, Letters of Credit (“LCs”) received from customers in payment of goods.

The following table shows total receivables sold under factoring agreements and proceeds from sales of LCs and related discounting fees paid for the three and six months ended December 31, 2007 and 2006:

(In thousands)	Three months ended		Six months ended	
	December 31, 2007	December 31, 2006	December 31, 2007	December 31, 2006
Receivables sold under factoring agreements	\$ 84,879	\$ 64,776	\$ 155,413	\$ 144,604
Proceeds from sales of LCs	\$ 10,710	\$ 8,523	\$ 17,528	\$ 38,712
Discounting fees paid on sales of LCs (1)	\$ 56	\$ 133	\$ 77	\$ 498

(1) Discounting fees were equivalent to interest expense and were recorded in interest income and other, net.

We maintain guarantee arrangements of \$30.2 million in various locations to fund customs guarantees for VAT and LC needs of our subsidiaries in Europe and Asia. Approximately \$20.5 million was outstanding under these arrangements as of December 31, 2007.

We maintain certain open inventory purchase commitments with our suppliers to ensure a smooth and continuous supply chain for key components. Our liability under these purchase commitments is generally restricted to a forecasted time-horizon as mutually agreed upon between the parties. This forecasted time-horizon can vary among different suppliers. Our open inventory purchase commitments were approximately \$174.8 million as of December 31, 2007 and are primarily due within the next 12 months. Actual expenditures will vary based upon the volume of the transactions and length of contractual service provided. In addition, the amounts paid under these arrangements may change in the event that the arrangements are renegotiated or canceled. Certain agreements provide for potential cancellation penalties.

As of December 31, 2007, the non-current tax payable under FIN 48 was \$84.3 million. We are unable to make a reasonably reliable estimate of the timing of payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes. This obligation is excluded from the schedule summarizing our significant obligations to make future payments under contractual obligations as of December 31, 2007 presented above.

In December 2007, we reached an agreement in principle for the settlement of a securities class action that named KLA-Tencor and certain of its current and former directors and officers as defendants relating to its historical stock option practices. Under the terms of a memorandum of understanding entered into in January 2008 confirming such agreement in principle, we will be required to make a payment of \$65.0 million to the settlement class. The settlement, which is subject to a final agreement and court approval, will provide a full release of KLA-Tencor and the other named defendants in connection with the allegation raised in the lawsuit. Accordingly, as the liability had been incurred at December 31, 2007 and it can be reasonably estimated, an amount of \$65.0 million has been accrued by a charge to SG&A expenses during the three months ended December 31, 2007.

During the fiscal year ended June 30, 2007, the Company accrued approximately \$20.2 million payable to non-executive holders of the amended options to compensate them for the resulting increase in their option exercise price. The \$20.2 million is payable in January 2008. This amount is included in other obligations in the table presented above.

We provide standard warranty coverage on our systems for 40 hours per week for twelve months, providing labor and parts necessary to repair the systems during the warranty period. We account for the estimated warranty cost as a charge to cost of revenues when revenue is recognized. The estimated warranty cost is based on historical product performance and field expenses. The actual product performance and/or field expense profiles may differ, and in those cases we adjust our warranty accruals accordingly. The difference between the estimated and actual warranty costs tends to be larger for new product introductions as there is limited historical product performance to estimate warranty expense; more mature

Table of Contents

products with longer product performance histories tend to be more stable in our warranty charge estimates. Non-standard warranty coverage generally includes services incremental to the standard 40-hour per week coverage for twelve months. See Note 11 "Commitments and Contingencies" to the Condensed Consolidated Financial Statements for a detailed description.

Working capital decreased to \$1,871.4 million as of December 31, 2007, compared to \$2,247.2 million as of June 30, 2007. This decrease is primarily due to cash payments for the repurchase of shares of \$809.8 million during the six months ended December 31, 2007 offset by cash generated from operations during the six months ended December 31, 2007. As of December 31, 2007, our principal sources of liquidity consisted of \$1,297.2 million of cash, cash equivalents, and marketable securities. Our liquidity is affected by many factors, some of which are based on the normal ongoing operations of the business, and others of which relate to the uncertainties of global economies and the semiconductor and the semiconductor equipment industries. Our investment portfolio consists of both corporate and government securities that have a maximum effective maturity of 10 years. The longer the duration of these securities, the more susceptible they are to changes in market interest rates and bond yields. As yields increase, those securities with a lower yield-at-cost show a mark-to-market unrealized loss. We have the ability to realize the full value of all these investments upon maturity. Unrealized losses are due to changes in interest rates and bond yields. Although cash requirements will fluctuate based on the timing and extent of these factors, we believe that cash generated from operations, together with the liquidity provided by existing cash balances, will be sufficient to satisfy our liquidity requirements for at least the next twelve months.

Off-Balance Sheet Arrangements

Under our foreign-currency risk management strategy, we utilize derivative instruments to protect our interests from unanticipated fluctuations in earnings and cash flows caused by volatility in currency exchange rates. This financial exposure is monitored and managed as an integral part of our overall risk management program which focuses on the unpredictability of financial markets and seeks to reduce the potentially adverse effects that the volatility of these markets may have on our operating results. The outstanding hedge contracts, with maximum maturity of 13 months, as of December 31, 2007 and June 30, 2007 were as follows:

<u>(In thousands)</u>	<u>As of December 31, 2007</u>	<u>As of June 30, 2007</u>
Cash flow hedge contracts		
Purchase	\$ 5,796	\$ 4,651
Sell	(248,387)	(242,942)
Other foreign currency hedge contracts		
Purchase	188,335	126,992
Sell	(325,413)	(265,378)
Net outstanding hedge contracts	<u>\$ (379,669)</u>	<u>\$ (376,677)</u>

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to financial market risks, including changes in interest rates, foreign currency exchange rates and marketable equity security prices. To mitigate these risks, we utilize derivative financial instruments, such as foreign currency hedges. We do not use derivative financial instruments for speculative or trading purposes. All of the potential changes noted below are based on sensitivity analyses performed on our financial position as of December 31, 2007. Actual results may differ materially.

As of December 31, 2007, we had an investment portfolio of fixed income securities of approximately \$749.6 million, excluding those classified as cash and cash equivalents. These securities, as with all fixed income instruments, are subject to interest rate risk and will fall in value if market interest rates increase. If market interest rates were to increase immediately and uniformly by 10% from levels as of December 31, 2007, the fair value of the portfolio would have declined by \$3.4 million.

As of December 31, 2007, we had net forward and options contracts to sell \$379.7 million in foreign currency in order to hedge currency exposures (see Note 12, "Derivative Instruments and Hedging Activities," to Condensed Consolidated Financial Statements (unaudited) for a detailed description). If we had entered into these contracts on December 31, 2007, the U.S. dollar equivalent would be \$388.9 million. A 10% adverse move in all currency exchange rates affecting the contracts would decrease the fair value of the contracts by \$54.1 million. However, if this occurred, the fair value of the underlying exposures hedged by the contracts would increase by a similar amount. Accordingly, we believe that the hedging of our foreign currency exposure should have no material impact on net income or cash flows.

[Table of Contents](#)

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures and Related CEO and CFO Certifications

Evaluation of Disclosure Controls and Procedures

The Company conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in the Rules 13a-15(e) and 15d-15(e) under the Exchange Act) (Disclosure Controls) as of the end of the period covered by this Report required by Exchange Act Rules 13a-15(b) or 15d-15b. The controls evaluation was conducted under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"). Based on this evaluation, the CEO and CFO have concluded that as of the end of the period covered by this report the Company's disclosure controls and procedures were effective at a reasonable assurance level.

Attached as exhibits to this Quarterly Report are certifications of the CEO and CFO, which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended ("Exchange Act"). This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications, and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

Definition of Disclosure Controls

Disclosure Controls are controls and procedures designed to reasonably assure that information required to be disclosed in the Company's reports filed under the Exchange Act, such as this Report, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure Controls are also designed to reasonably assure that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. The Company's Disclosure Controls include components of its internal control over financial reporting, which consists of control processes designed to provide reasonable assurance regarding the reliability of its financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles in the United States. To the extent that components of the Company's internal control over financial reporting are included within its Disclosure Controls, they are included in the scope of the Company's annual controls evaluation.

Limitations on the Effectiveness of Controls

The Company's management, including the CEO and CFO, does not expect that the Company's disclosure controls or internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

There were no changes in the Company's internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth above under Note 10 contained in the Condensed Consolidated Financial Statements in Item 1 of Part I is incorporated herein by reference.

ITEM 1A. RISK FACTORS

The risk factors included herein include any material changes to and supersede the description of the risk factors as previously disclosed in Item 1A to Part I of our Annual Report on Form 10-K for the year ended June 30, 2007, filed with the Securities and Exchange Commission on August 20, 2007.

Risks Associated with Our Industry and Market Conditions

The semiconductor equipment industry is highly cyclical. The purchasing decisions of our customers are highly dependent on the economies of both the local markets in which they are located and the semiconductor industry worldwide. If we fail to respond to industry cycles, our business could be seriously harmed.

The timing, length and severity of the up-and-down cycles in the semiconductor equipment industry are difficult to predict. This cyclical nature of the industry in which we operate affects our ability to accurately predict future revenue and, thus, future expense levels. In the current environment, our ability to accurately predict future revenue and expense levels is particularly low. When cyclical fluctuations result in lower than expected revenue levels, operating results may be adversely affected and cost reduction measures may be necessary in order for us to remain competitive and financially sound. During a down cycle, we must be in a position to adjust our cost and expense structure to prevailing market conditions and to continue to motivate and retain our key employees. In addition, during periods of rapid growth, we must be able to increase manufacturing capacity and personnel to meet customer demand. We can provide no assurance that these objectives can be met in a timely manner in response to industry cycles.

Our business is ultimately driven by the global demand for electronic devices by consumers and businesses. A majority of our annual revenue is derived from outside the United States, and we expect that international revenue will continue to represent a substantial percentage of our revenue. A protracted global economic slowdown may adversely affect our business and results of operations.

A majority of our annual revenue is derived from outside the United States, and we expect that international revenue will continue to represent a substantial percentage of our revenue. Our international revenue and operations are affected by economic conditions specific to each country and region. Because of our significant dependence on international revenue, a decline in the economies of any of the countries or regions in which we do business could negatively affect our operating results. Managing global operations and sites located throughout the world presents challenges associated with, among other things, cultural diversity and organizational alignment. Moreover, each region in the global semiconductor equipment market exhibits unique characteristics that can cause capital equipment investment patterns to vary significantly from period to period. Periodic local or international economic downturns, trade balance issues, political instability, legal or regulatory changes or terrorism in regions where we have operations along with fluctuations in interest and currency exchange rates could negatively affect our business and results of operations. Although we attempt to manage near-term currency risks through the use of hedging instruments, there can be no assurance that such efforts will be adequate.

Our future performance depends, in part, upon our ability to continue to compete successfully worldwide.

Our industry includes large manufacturers with substantial resources to support customers worldwide. Some of our competitors are diversified companies with greater financial resources and more extensive research, engineering, manufacturing, marketing and customer service and support capabilities than we possess. We face competition from companies whose strategy is to provide a broad array of products and services, some of which compete with the products and services that we offer. These competitors may bundle their products in a manner that may discourage customers from purchasing our products, including pricing such competitive tools significantly below our product offerings. In addition, we face competition from smaller emerging semiconductor equipment companies whose strategy is to provide a portion of the products and services that we offer, using innovative technology to sell products into specialized markets. Loss of competitive position could negatively affect our prices, customer orders, revenue, gross margins, and market share, any of which would negatively affect our operating results and financial condition.

[Table of Contents](#)

Risks Related to Our Business

If we do not develop and introduce new products and technologies in a timely manner in response to changing market conditions or customer requirements, our business could be seriously harmed.

Success in the semiconductor equipment industry depends, in part, on continual improvement of existing technologies and rapid innovation of new solutions. For example, the size of semiconductor devices continues to shrink and the industry is currently transitioning to the use of new materials and innovative fab processes. While we expect these trends will increase our customers' reliance on our diagnostic products, we cannot be sure that they will directly improve our business. These and other evolving customer needs require us to respond with continued development programs and to cut back or discontinue older programs, which may no longer have industry-wide support. Technical innovations are inherently complex and require long development cycles and appropriate staffing of highly qualified employees. Our competitive advantage and future business success depend on our ability to accurately predict evolving industry standards, to develop and introduce new products that successfully address changing customer needs, to win market acceptance of these new products and to manufacture these new products in a timely and cost-effective manner.

In this environment, we must continue to make significant investments in research and development in order to enhance the performance and functionality of our products, to keep pace with competitive products and to satisfy customer demands for improved performance, features and functionality. Substantial research and development costs typically are incurred before we confirm the technical feasibility and commercial viability of a new product, and not all development activities result in commercially viable products. There can be no assurance that revenue from future products or product enhancements will be sufficient to recover the development costs associated with such products or enhancements. In addition, we cannot be sure that these products or enhancements will receive market acceptance or that we will be able to sell these products at prices that are favorable to us. Our business will be seriously harmed if we are unable to sell our products at favorable prices or if the market in which we operate does not accept our products.

Our business would be harmed if we do not receive sufficient parts to meet our production requirements in a timely and cost-effective manner.

We use a wide range of materials in the production of our products, including custom electronic and mechanical components, and we use numerous suppliers to supply these materials. We generally do not have guaranteed supply arrangements with our suppliers. Because of the variability and uniqueness of customers' orders, we do not maintain an extensive inventory of materials for manufacturing. We seek to minimize the risk of production and service interruptions and/or shortages of key parts by selecting and qualifying alternative suppliers for key parts, monitoring the financial stability of key suppliers and maintaining appropriate inventories of key parts. Although we make reasonable efforts to ensure that parts are available from multiple suppliers, key parts may be available only from a single supplier or a limited group of suppliers. Our operating results and business may be adversely impacted if we are unable to obtain parts to meet our production requirements, or if we are only able to do so on unfavorable terms.

Disruption of our manufacturing facilities due to earthquake, flood, other natural catastrophic events or terrorism could result in cancellation of orders or loss of customers and could seriously harm our business.

Most of our manufacturing facilities are located in the United States, with additional operations located in Israel and Singapore. Operations at our manufacturing facilities and our assembly subcontractors are subject to disruption for a variety of reasons, including work stoppages, acts of war, terrorism, fire, earthquake, energy shortages, flooding or other natural disasters. Such disruption could cause delays in shipments of products to our customers. We cannot ensure that alternate production capacity would be available if a major disruption were to occur or that, if it were available, it could be obtained on favorable terms.

We outsource a number of services to third-party service providers, which decreases our control over the performance of these functions. Disruptions or delays at our third-party service providers could adversely impact our operations.

We outsource a number of services, including our transportation and logistics management of spare parts, to domestic and overseas third-party service providers. While outsourcing arrangements may lower our cost of operations, they also reduce our direct control over the services rendered. It is uncertain what effect such diminished control will have on the quality or quantity of products delivered or services rendered, or our ability to quickly respond to changing market conditions. Disruptions or delays at our third-party service providers due to events such as regional economic, business, environmental or political events, information technology system failures or military actions could adversely impact our operations and our ability to ship products, manage our product inventory or record and report financial and management information on a timely and accurate basis.

Our success is dependent in part on our technology and other proprietary rights. If we are unable to maintain our lead or protect our proprietary technology, we may lose valuable assets and market share.

Our success is dependent in part on our technology and other proprietary rights. We own various United States and international patents and have additional pending patent applications relating to some of our products and technologies. The

Table of Contents

process of seeking patent protection is lengthy and expensive, and we cannot be certain that pending or future applications will actually result in issued patents or that issued patents will be of sufficient scope or strength to provide meaningful protection or commercial advantage to us. Other companies and individuals, including our larger competitors, may develop technologies and obtain patents relating to our business that are similar or superior to our technology or may design around the patents we own, adversely affecting our business.

We also maintain trademarks on certain of our products and services and claim copyright protection for certain proprietary software and documentation. However, we can give no assurance that our trademarks and copyrights will be upheld or successfully deter infringement by third parties.

While patent, copyright and trademark protection for our intellectual property is important, we believe our future success in highly dynamic markets is most dependent upon the technical competence and creative skills of our personnel. We attempt to protect our trade secrets and other proprietary information through confidentiality and other agreements with our customers, suppliers, employees and consultants and through other security measures. We also maintain exclusive and non-exclusive licenses with third parties for strategic technology used in certain products. However, these employees, consultants and third parties may breach these agreements, and we may not have adequate remedies for wrongdoing. In addition, the laws of certain territories in which we develop, manufacture or sell our products may not protect our intellectual property rights to the same extent as do the laws of the United States. In any event, the extent to which we can protect our trade secrets through the use of confidentiality agreements is limited, and our success will depend to a significant extent on our ability to innovate ahead of our competitors.

We might be involved in intellectual property disputes or other intellectual property infringement claims that may be costly to resolve, prevent us from selling or using the challenged technology and seriously harm our operating results and financial condition.

As is typical in the semiconductor equipment industry, from time to time we have received communications from other parties asserting the existence of patent rights, copyrights, trademark rights or other intellectual property rights which they believe cover certain of our products, processes, technologies or information. Litigation tends to be expensive and requires significant management time and attention and could have a negative effect on our results of operations or business if we lose or have to settle a case on significantly adverse terms. Our customary practice is to evaluate such infringement assertions and to consider whether to seek licenses where appropriate. However, we cannot ensure that licenses can be obtained or, if obtained, will be on acceptable terms or that costly litigation or other administrative proceedings will not occur. The inability to obtain necessary licenses or other rights on reasonable terms, or the instigation of litigation or other administrative proceedings, could seriously harm our operating results and financial condition.

We depend on key personnel to manage our business effectively, and if we are unable to attract, retain and motivate our key employees, our sales and product development could be harmed.

Our employees are vital to our success, and our key management, engineering and other employees are difficult to replace. We generally do not have employment contracts with our key employees. Further, we do not maintain key person life insurance on any of our employees. The expansion of high technology companies worldwide has increased demand and competition for qualified personnel. If we are unable to retain key personnel, or if we are not able to attract, assimilate or retain additional highly qualified employees to meet our needs in the future, our business and operations could be harmed.

Acquisitions are an important element of our strategy but, because of the uncertainties involved, we may not find suitable acquisition candidates and we may not be able to successfully integrate and manage acquired businesses.

In addition to our efforts to develop new technologies from internal sources, part of our growth strategy is to pursue acquisitions and acquire new technologies from external sources. As part of this effort, we may make acquisitions of, or significant investments in, businesses with complementary products, services and/or technologies. There can be no assurance that we will find suitable acquisition candidates or that acquisitions we complete will be successful. In addition, we may use equity to finance future acquisitions, which would increase our number of shares outstanding and be dilutive to current shareholders.

If we are unable to successfully integrate and manage acquired businesses or if acquired businesses perform poorly, then our business and financial results may suffer. It is possible that the businesses we have acquired, as well as businesses that we may acquire in the future, may perform worse than expected or prove to be more difficult to integrate and manage than expected. In addition, we may lose key employees of the acquired companies. As a result, risks associated with acquisition transactions may give rise to a material adverse effect on our business and financial results for a number of reasons, including:

- we may have to devote unanticipated financial and management resources to acquired businesses;

Table of Contents

- we may not be able to realize expected operating efficiencies or product integration benefits from our acquisitions;
- we may have to write-off goodwill or other intangible assets; and
- we may incur unforeseen obligations or liabilities in connection with acquisitions.

Compliance with federal securities laws, rules and regulations, as well as Nasdaq requirements, is becoming increasingly complex, and the significant attention and expense we must devote to those areas may have an adverse impact on our business.

Federal securities laws, rules and regulations, as well as Nasdaq rules and regulations, require companies to maintain extensive corporate governance measures, impose comprehensive reporting and disclosure requirements, set strict independence and financial expertise standards for audit and other committee members and impose civil and criminal penalties for companies and their chief executive officers, chief financial officers and directors for securities law violations. These laws, rules and regulations have increased and will continue to increase the scope, complexity and cost of our corporate governance, reporting and disclosure practices, which could harm our results of operations and divert management's attention from business operations.

We are predominantly uninsured for losses and interruptions caused by terrorist acts and acts of war. If international political instability continues or increases, our business and results of operation could be harmed.

The threat of terrorism targeted at the regions of the world in which we do business increases the uncertainty in our markets. Any act of terrorism which affects the economy or the semiconductor industry could adversely affect our business. Increased international political instability, disruption in air transportation and further enhanced security measures as a result of terrorist attacks, and the continuing instability in the Middle East, may hinder our ability to do business and may increase our costs of operations. Such continuing instability could cause us to incur increased costs in transportation, make such transportation unreliable, increase our insurance costs, and cause international currency markets to fluctuate. This same instability could have the same effects on our suppliers and their ability to timely deliver their products. If this international political instability continues or increases, our business and results of operations could be harmed. We are predominantly uninsured for losses and interruptions caused by terrorist acts and acts of war.

We self insure certain risks including earthquake risk. If one or more of the uninsured events occurs, we could suffer major financial loss.

We purchase insurance to help mitigate the economic impact of certain insurable risks; however, certain other risks are uninsurable or are insurable only at significant cost and cannot be mitigated with insurance. An earthquake could significantly disrupt our manufacturing operations, most of which are conducted in California. It could also significantly delay our research and engineering effort on new products, most of which is also conducted in California. We take steps to minimize the damage that would be caused by an earthquake, but there is no certainty that our efforts will prove successful in the event of an earthquake. We self insure earthquake risks because we believe this is a prudent financial decision based on our large cash reserves and the high cost and limited coverage available in the earthquake insurance market. Certain other risks are also self insured either based on a similar cost benefit analysis, or based on the unavailability of insurance. If one or more of the uninsured events occurs, we could suffer major financial loss.

A change in accounting standards or practices or a change in existing taxation rules or practices can have a significant effect on our reported results and may even affect reporting of transactions completed before the change is effective.

New accounting pronouncements and taxation rules and varying interpretations of accounting pronouncements and taxation rules have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business.

For example, the adoption of Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment* which required us to measure all employee stock-based compensation awards using a fair value method beginning in fiscal year 2006 and record such expense in our consolidated financial statements, has had a material impact on our consolidated financial statements, as reported under accounting principles generally accepted in the United States of America.

A change in the effective tax rate can have a significant adverse impact on our business.

A number of factors may harm our future effective tax rates such as the jurisdictions in which profits are determined to be earned and taxed, the resolution of issues arising from tax audits with various tax authorities, changes in the valuation of our deferred tax assets and liabilities, adjustments to estimated taxes upon finalization of various tax returns, increases in

Table of Contents

expenses not deductible for tax purposes, including write-offs of acquired in-process research and development and impairment of goodwill in connection with acquisitions, changes in available tax credits, changes in share-based compensation expense, changes in tax laws or the interpretation of such tax laws and changes in generally accepted accounting principles and the repatriation of non-U.S. earnings for which we have not previously provided for U.S. taxes. A change in the effective tax rate can adversely impact our results from operations.

We are exposed to various risks related to the regulatory environments where we perform our operations and conduct our business.

We are subject to various risks related to new, different, inconsistent or even conflicting laws, rules and regulations that may be enacted by legislative bodies and/or regulatory agencies in the countries in which we operate and with which we must comply, including environmental and safety regulations. Changes to existing laws, rules or regulations, including changes that result in inconsistent or conflicting laws, rules or regulations, in the countries in which we operate may adversely affect our reported financial results or the way we conduct our business.

We are exposed to foreign currency exchange rate fluctuations; although we hedge certain currency risks, we may still be adversely affected by changes in foreign currency exchange rates or declining economic conditions in these countries.

We have some exposure to fluctuations in foreign currency exchange rates, primarily the Japanese Yen. We have international subsidiaries that operate and sell our products globally. We routinely hedge these exposures in an effort to minimize the impact of currency rate fluctuations, but these hedges may be inadequate to protect us from currency rate fluctuations. To the extent that these hedges are inadequate, our reported financial results or the way we conduct our business could be adversely affected.

We are exposed to fluctuations in the market values of our portfolio investments and in interest rates; impairment of our investments could harm our earnings.

Our investment portfolio consists of both corporate and government securities that have a maximum effective maturity of 10 years. The longer the duration of these securities, the more susceptible they are to changes in market interest rates and bond yields. As yields increase, those securities with a lower yield-at-cost show a mark-to-market unrealized loss. We have the ability to realize the full value of all these investments upon maturity. Unrealized losses are due to changes in interest rates and bond yields.

We rely upon certain critical information systems for our daily business operation. Our inability to use or access these information systems at critical points in time could unfavorably impact the timeliness and efficiency of our business operation.

Our global operations are linked by information systems, including telecommunications, the internet, our corporate intranet, network communications, email and various computer hardware and software applications. Despite our implementation of network security measures, our tools and servers are vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our computer systems and tools located at customer sites. Any such event could have an adverse effect on our business, operating results and financial condition.

We may experience difficulties with the implementation of our customer relationship management (“CRM”) system or existing enterprise resource planning (“ERP”) system and other IT systems. System failure or malfunctioning may result in a disruption of operations or the inability to process transactions, and this could adversely affect our financial results.

We may experience difficulties with our new CRM system to be implemented in fiscal year 2008 that could disrupt our ability to timely and accurately process and report key components of the results of our consolidated operations, our financial position and cash flows. System failure or malfunctioning could disrupt our ability to timely and accurately process and report key components of our results of operations, financial position and cash flows. Any disruptions or difficulties that may occur in connection with our ERP system or other systems could also adversely affect our ability to complete important business processes such as the evaluation of our internal controls and attestation activities pursuant to Section 404 of the Sarbanes-Oxley Act of 2002. If we encounter unforeseen problems with regard to our ERP system or other systems, our business could be adversely affected.

[Table of Contents](#)

Risks Related to the Restatement of Our Prior Financial Results

Our efforts to correct past material weaknesses in our internal controls may not have been sufficient, and we may discover additional material weaknesses in our internal controls.

As previously disclosed, the Company has undergone an investigation of the Company's historical stock option practices by the Special Committee of the Company's Board of Directors (for more information regarding the Special Committee investigation and its findings, please refer to Item 3, "Legal Proceedings" in our Annual Report on Form 10-K for the fiscal year ended June 30, 2007, which was filed with the SEC on August 20, 2007). As a result of that Special Committee investigation and our management's internal review of our historical stock option practices and related matters, we identified past material weaknesses in our internal controls and procedures (see Item 9A, "Controls and Procedures" in our Annual Report on Form 10-K for the fiscal year ended June 30, 2007, which was filed with the SEC on August 20, 2007). A "material weakness" is a control deficiency, or combination of them, that results in more than a remote likelihood that a material misstatement in our financial statements will not be prevented or detected. We believe that we have remedied the past material weaknesses in our internal controls and procedures, but there can be no assurance that our corrections were sufficient or fully effective, or that we will not discover additional material weaknesses in our internal controls and procedures in the future.

The Special Committee investigation of our historical stock option practices and the resulting restatements have been time consuming and expensive, and have had a material adverse effect on us.

The Special Committee investigation and the resulting restatement activities have required us to expend significant management time and incur significant accounting, legal and other expenses. In addition, we have established a Special Litigation Committee to oversee the litigation matters that have arisen out of the investigation and the restatements, and we cannot predict what additional actions may be required by these Committees. The period of time that will be necessary to resolve these matters is uncertain, and these matters could require significant additional attention and resources.

The ongoing government inquiries relating to our historical stock option practices is time consuming and expensive and could result in injunctions, fines and penalties that may have a material adverse effect on our financial condition, results of operations and cash flow.

On July 25, 2007, we announced that the Company had reached a settlement with the SEC by consenting to the entry of a permanent injunction against future violations of the reporting, books and records, and internal controls provisions of the federal securities laws. The settlement resolves completely the SEC investigation into the Company's historical stock option granting practices. KLA-Tencor was not charged by the SEC with fraud, nor was the Company required to pay any civil penalty, fine or money damages as part of the settlement. While the SEC has completed its investigation, the inquiry by the United States Attorney's Office for the Northern District of California ("USAO") into our historical stock option practices is ongoing. We have fully cooperated with the USAO and intend to continue to do so. The period of time necessary to resolve this inquiry is uncertain, and we cannot predict the outcome of this inquiry or whether we will face additional government inquiries, investigations or other actions related to our historical stock option practices. The Company has also responded to inquiries from the U.S. Department of Labor, which is conducting an examination of the Company's 401(k) Savings Plan prompted by the Company's stock option issues. The Company is cooperating fully with this examination and intends to continue to do so. Further, the Internal Revenue Service is conducting an audit covering calendar year 2006 related to the Company's historical stock option practices. These inquiries may require us to continue to expend significant management time and incur significant legal and other expenses, and could result in criminal actions seeking, among other things, injunctions against the Company and the payment of significant fines and penalties by the Company, which may have a material adverse effect on our financial condition, results of operations and cash flow.

We have been named as a party to a number of shareholder derivative and class action lawsuits relating to our historical stock option practices, and we may be named in additional lawsuits in the future. This litigation could become time consuming and expensive and could result in the payment of significant judgments and settlements, which could have a material adverse effect on our financial condition and results of operations.

In connection with our historical stock option practices and resulting restatements, a number of derivative actions were filed against certain of our current and former directors and officers purporting to assert claims on the Company's behalf. In addition, a number of securities class action complaints were filed against us and certain of our current and former directors and officers seeking damages related to our historical stock option practices and the resulting investigation, inquiries and restatements. There may be additional lawsuits of this nature filed in the future. We cannot predict the outcome of these lawsuits, other than the shareholder class action for which we have agreed in principle on a settlement (as described in Note 10, "Litigation and Other Legal Matters"), nor can we predict the amount of time and expense that will be required to resolve these lawsuits. If these lawsuits

Table of Contents

become time consuming and expensive, or if there are unfavorable outcomes in any of these cases, there could be a material adverse effect on our business, financial condition and results of operations.

Our insurance coverage will not cover our total liabilities and expenses in these lawsuits, in part because we have a significant deductible on certain aspects of the coverage. In addition, subject to certain limitations, we are obligated to indemnify our current and former directors, officers and employees in connection with the investigation of our historical stock option practices and the related litigation and ongoing government inquiry. We currently hold insurance policies for the benefit of our directors and officers, although our insurance coverage may not be sufficient in some or all of these matters. Furthermore, the insurers may seek to deny or limit coverage in some or all of these matters, in which case we may have to self-fund all or a substantial portion of our indemnification obligations.

We are subject to the risks of additional government actions, shareholder lawsuits and other legal proceedings related to our historical stock option practices, the resulting restatements, and the remedial measures we have taken.

It is possible that there may be additional governmental actions, shareholder lawsuits and other legal proceedings brought against us in connection with our historical stock option practices. In addition, we may be sued or taken to arbitration by former officers and employees in connection with their stock options, employment terminations and other matters. These proceedings may require us to expend significant management time and incur significant accounting, legal and other expenses, and may divert attention and resources from the operation of our business. These expenditures and diversions, as well as the adverse resolution of any specific lawsuit, could have a material adverse effect on our business, financial condition and results of operations.

Failure to maintain effective internal controls may cause us to delay filing our periodic reports with the SEC, affect our Nasdaq listing, and adversely affect our stock price.

The Securities and Exchange Commission, as directed by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring public companies to include a report of management on internal control over financial reporting in their annual reports on Form 10-K that contain an assessment by management of the effectiveness of the Company's internal control over financial reporting. In addition, our independent registered public accounting firm must attest to and report on the effectiveness of the internal control over financial reporting. The Company has in prior periods identified certain material weaknesses in its internal control over financial reporting. However, we believe the Company remediated those past material weaknesses, and we have not identified any material weaknesses in our internal control over financial reporting for the fiscal year ended June 30, 2007. Although we review our internal control over financial reporting in order to ensure compliance with the Section 404 requirements, if our independent registered public accounting firm is not satisfied with our internal control over financial reporting or the level at which these controls are documented, designed, operated or reviewed, or if our independent registered public accounting firm interprets the requirements, rules and/or regulations differently from our interpretation, then they may issue a report that is qualified. This could result in an adverse reaction in the financial marketplace due to a loss of investor confidence in the reliability of our financial statements, which ultimately could negatively impact our stock price.

It may be difficult or costly to obtain director and officer insurance coverage as a result of the issues arising out of our historical stock option practices.

We expect that the issues arising from our previous retroactive pricing of stock options will make it more difficult to obtain director and officer insurance coverage in the future. If we are able to obtain this coverage, it could be significantly more costly than in the past, which would have an adverse effect on our financial results and cash flow. As a result of this and related factors, our directors and officers could face increased risks of personal liability in connection with the performance of their duties. As a result, we may have difficulty attracting and retaining qualified directors and officers, which could adversely affect our business.

ITEM 2. UNREGISTERED SALES AND PURCHASES OF EQUITY SECURITIES AND USE OF PROCEEDS

Following is a summary of stock repurchases for the three months ended December 31, 2007.⁽¹⁾

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(3)</u>
October 1, 2007 to October 31, 2007(2)	80,000	\$ 52.69	11,001,000
November 1, 2007 to November 30, 2007(2)	1,660,000	\$ 49.55	9,341,000
December 1, 2007 to December 31, 2007(2)	960,000	\$ 49.05	8,381,000
Total	<u>2,700,000</u>	\$ 49.47	

- (1) In July 1997, the Board of Directors authorized KLA-Tencor to systematically repurchase shares of its common stock in the open market. Since the inception of the repurchase program in 1997 through December 31, 2007, the Board of Directors has authorized KLA-Tencor to repurchase a total of 47.8 million shares. The Company's systematic buyback program was suspended in May 2006, and resumed in February 2007.

Table of Contents

- (2) All shares were purchased pursuant to the publicly announced repurchase programs described in footnote 1 above.
- (3) The stock repurchase programs have no expiration date. Future repurchases of the Company's common stock under the Company's repurchase programs may be effected through various different repurchase transaction structures, including isolated open market transactions or systematic repurchase plans.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company's Annual Meeting of Stockholders was held on November 15, 2007 at the Company's principal executive offices in Milpitas, California. Of the 182,147,118 shares of the Company's common stock outstanding as of October 2, 2007 (the record date), 167,894,029 shares, or 92%, were present or represented by proxy at the meeting. Three proposals were considered at the meeting.

Proposal One. The stockholders elected the Company's three Class III nominees to its Board of Directors to each serve for a three-year term, each until his successor is duly elected. The table below presents the results of the election.

<u>Name</u>	<u>For</u>	<u>Withheld</u>
Edward W. Barnholt	157,092,349	10,801,680
Stephen P. Kaufman	161,759,970	6,134,059
Richard P. Wallace	161,729,801	6,164,228

The Company's Class I directors (Robert M. Calderoni, John T. Dickson, Kevin J. Kennedy and Lida Urbanek) and Class II directors (H. Raymond Bingham, Robert T. Bond and David C. Wang) were not subject to reelection at the annual meeting, and their respective terms of office as members of the Board of Directors continued after the meeting.

Proposal Two. The stockholders approved an amendment to the Company's 2004 Equity Incentive Plan (the "2004 Plan") to (a) increase the number of shares reserved for issuance under the 2004 Plan by 8,500,000 shares, (b) expand and reapprove the list of corporate performance goals to which the vesting of certain awards made under the plan may be tied in order to qualify those awards as performance-based compensation for purposes of Section 162(m) of the Internal Revenue Code of 1986, and (c) effect a series of technical revisions to the plan in order to address recent tax and accounting developments affecting the administration of the plan. This proposal received 117,057,371 votes in favor of the amendment, 34,104,482 votes against the amendment, 1,862,894 abstentions and 14,869,282 broker non-votes.

Proposal Three. The stockholders ratified the appointment of PricewaterhouseCoopers LLP as the Company's independent registered public accounting firm for the fiscal year ending June 30, 2008. This proposal received 160,128,184 votes for, 5,969,963 votes against and 1,795,882 abstentions.

ITEM 5. OTHER INFORMATION

RELEASE AGREEMENT

CONSIDERATION

(1) This Release Agreement is given in consideration of the agreement of KLA-Tencor Corporation ("KLA-Tencor" or "the Company") to provide me with a lump sum, single payment, less deductions authorized or required by law pursuant to the terms of Appendix 1 to my termination letter dated November 9, 2007, with the terms of Appendix 1 incorporated herein by reference.

(2) The amount of such lump sum payment will be \$443,490.00 USD; and, provided I timely elect COBRA coverage, the Company will pay the premiums for the cost of group medical and dental benefit coverage continuation under COBRA to the same extent previously provided by Company's group plans for 12 months following my termination date, or until I become eligible for group insurance benefits from another employer, whichever occurs first. I understand that I have an obligation to inform the Company if I receive group health coverage from another employer during this time, and I may not increase the number of my designated dependants if any, during this time unless I do so at my own expense. I also understand that the period of such Company-paid COBRA coverage shall be considered part of my COBRA coverage entitlement period, and may, for tax purposes, be considered income to me. I further understand that my previously issued and vested equity awards (stock options and RSUs), if any, will be exercisable subject to any terms and conditions in your grant letter and the Stock Plan(s). I further understand that the Company will continue to pay on my behalf the standard fees of Ayco Financial Services for the provision of ordinary tax and financial planning services through December 31, 2007. I further agree to cooperate with Company and supply on a timely basis the consents or signatures necessary to conduct the business or terminate my service on the boards of directors of Company subsidiaries and affiliates. Also, I understand that the Company will present resolutions to the Board at its November 7, 2007 meeting addressing the repricing of Section 409A-covered options to the fair market value per share on the actual grant date determined for tax purposes and providing for a special bonus tied to the aggregate increase to the exercise prices of the Section 409A-covered options I hold. I further understand that if I elect to increase the exercise prices of my Section 409A-covered options, I must, as a condition to the effectiveness of those increases, execute and deliver to the Company the appropriate Stock Option Amendment and Special Bonus Agreement. I further understand that should I exercise those options covered under 409A prior to the repricing of said options on November 7, 2007, I will not hold KLA-Tencor liable for any associated tax penalties and understand that the tax liability is solely mine

(3) I understand and agree that by signing this Release Agreement and accepting benefits as set forth herein, I am not eligible to participate in any other KLA-Tencor Severance Benefit Plans, whether previously or currently in effect or otherwise implemented in the future.

RELEASE

Released Claims

In consideration of these additional benefits, I, on behalf of my heirs, spouse and assigns, hereby completely release and forever discharge KLA-Tencor, its past and present parent companies, subsidiaries, affiliates, and each of their past and present agents, officers, directors, shareholders, employees, attorneys, insurers, successors and assigns (collectively referred to as "Company") from any and all claims, of any and every kind, nature and character, known or unknown, foreseen or unforeseen, based on any act or omission occurring prior to the date of my signing this Release Agreement, including but not limited to any claims arising out of my offer of employment, my employment or termination of my employment with the Company, or my right to purchase, or actual purchase of shares of stock of the Company. The matters released include, but are not limited to, any claims under federal, state or local laws, including claims arising under the Age Discrimination in Employment Act of 1967 ("ADEA") as amended by the Older Workers' Benefit Protection Act ("OWBPA"), and any common law tort, contract or statutory claims, and any claims for attorneys' fees and costs.

I understand and agree that this Release Agreement extinguishes all claims, whether known or unknown, foreseen or unforeseen, except for those claims not released as expressly described below. I expressly waive any rights or benefits under Section 1542 of the California Civil Code, or any equivalent statute. California Civil Code Section 1542 provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I fully understand that, if any fact with respect to any matter covered by this Release Agreement is found hereafter to be other than or different from the facts now believed by me to be true, I expressly accept and assume that this Release Agreement shall be and remain effective, notwithstanding such difference in the facts.

Claims Not Released

The only claims not released through this Release Agreement are any claims that cannot be released by law such as claims for unemployment benefits, workers' compensation, and/or claims relating to the validity of this Release Agreement under the ADEA as amended by the OWBPA.

Enforcement of This Release Agreement

I also understand and agree that if any suit, affirmative defense, or counterclaim is brought to enforce the provisions of this Release Agreement, with the exception of a claim brought by me as to the validity of this Release Agreement under the ADEA as amended by the OWBPA, the prevailing party shall be entitled to its costs, expenses, and attorneys' fees as well as any and all other remedies specifically authorized under the law.

Miscellaneous

I agree and understand that the Company has no obligation to re-hire or employ me.

I further acknowledge that during my employment, I may have obtained confidential, proprietary and trade secret information, including information relating to the Company's products, plans, designs and other valuable confidential information. I agree not to use or disclose any such confidential information unless required by subpoena or court order, and that I will first give the Company written notice of such subpoena or court order with reasonable advance notice to permit the Company to oppose such subpoena or court order if it chooses to do so.

This Release Agreement constitutes the entire agreement between myself and the Company with respect to any matters referred to in this Release Agreement. This Release Agreement supersedes any and all of the other agreements between me and the Company, except for the **Proprietary Information and Inventions Agreement**, attached hereto as Attachment 1, which remain in full force and effect. No other consideration, agreements, representations, oral statements, understandings or course of conduct which are not expressly set forth in this Release Agreement should be implied or are binding. I understand and agree that this Release Agreement shall not be deemed or construed at any time or for any purposes as an admission of any liability or wrongdoing by either myself or the Company. I also agree that if any provision of this Release Agreement is deemed invalid, the remaining provisions will still be given full force and effect. The terms and conditions of this Release Agreement will be interpreted and construed in accordance with the laws of California, without resort to its conflict-of-laws rules.

Prior to execution of this Release Agreement, I have apprised myself of sufficient relevant information in order that I might intelligently exercise my own judgment. The Company has informed me in writing to consult an attorney before signing this Release, if I wish. The Company has also given me at least 21 days in which to consider this Release Agreement, if I wish. I also understand that for a period of seven (7) days after I sign this Release Agreement, I may revoke this Release Agreement, and that the Release Agreement shall not become effective until seven (7) days from the date of my signature.

I have read this Release Agreement and understand all of its terms. I further acknowledge and agree that this Release Agreement is executed voluntarily and with full knowledge of its legal significance.

Finally, I agree that I will not disclose voluntarily or allow anyone else to disclose either the existence, reason for or contents of this Release Agreement without the Company's prior written consent, unless required to do so by law. Notwithstanding this provision, I am authorized to disclose this Release Agreement to my spouse, attorneys and tax advisors on a "need to know" basis, on the condition that they agree to hold the terms of the Release Agreement, including the settlement payments, in strictest confidence. I am further authorized to make appropriate disclosures as required by law, provided that I notify the Company in writing of such legal obligations to disclose at least five (5) business days in advance of disclosure.

EMPLOYEE'S ACCEPTANCE OF RELEASE

I HAVE CAREFULLY READ AND FULLY UNDERSTAND AND VOLUNTARILY AGREE TO ALL THE TERMS OF THE RELEASE IN EXCHANGE FOR THE ADDITIONAL BENEFITS TO WHICH I WOULD OTHERWISE NOT BE ENTITLED.

Dated: October 10, 2007

/s/ JORGE TITINGER
Jorge Titinger

Appendix 1

Notwithstanding any provision to the contrary in this Senior Executive Agreement or the attached Release Agreement, in the event it is determined that you are a “specified employee”, as defined in IRC Section 409A(a)(2)(B)(i) any payment to be made under this agreement and the attached release that is “nonqualified deferred compensation” subject to Section 409A of the Internal Revenue Code of 1986, as amended (“IRC Section 409A”) shall be delayed until the *earlier* of (i) the expiration of the six (6)-month period measured from the date of your separation from service from the Company (as determined under IRC Section 409A and the applicable regulations thereunder) or (ii) the date of your death, if delayed issuance of all or a portion of such payment is otherwise required in order to avoid a prohibited distribution under IRC Section 409A(a)(2). Upon the expiration of the applicable IRC Section 409A(a)(2) deferral period, all payments deferred pursuant to this paragraph will be issued in a lump sum to you.

The payments in this Senior Executive Agreement and the attached Release Agreement, to the extent they relate to nonqualified deferred compensation subject to IRC Section 409A, are intended to comply with the applicable requirements of that statutory provision and the regulations thereunder, including any transitional relief provided by the Internal Revenue Service. The payments in this agreement may not be accelerated, except in compliance with any applicable provisions of IRC Section 409A and the regulations thereunder. Both parties acknowledge that you had no right to any of the payments and other benefits in this agreement prior to the effective date of this letter. Any amendments to this arrangement will require the written consent of you and me. Notwithstanding the forgoing sentence to the contrary, the Company reserves the right, to the extent the Company deems necessary or advisable in its sole discretion, to unilaterally amend or modify this agreement and release as may be necessary to ensure all payments provide under this agreement and release are made in a manner that qualifies for exemption from or complies with IRC Section 409A; provided however, that the Company makes no representations that the payments provided under the agreement and release will be exempt from or comply with IRC Section 409A and makes no undertakings to preclude IRC Section 409A from applying to the payments provided under this agreement and release.

Because IRC Section 409A is a relatively new tax provision as to which there exists only limited guidance from the Internal Revenue Service as to its applicability to various arrangements, including part-time employment arrangements such as your Position arrangement, the Company cannot provide any assurances as to whether one or more aspects of your Position arrangement are in compliance with the applicable requirements of IRC Section 409A. Accordingly, you must bear the entire risk with respect to the non-compliance of your arrangement with IRC Section 409A. By signing and accepting this letter below, you thereby knowingly and voluntarily release the Company and its officers, employees and board of directors from any and all claims or causes of action relating to any adverse tax consequences that you may incur under IRC Section 409A (or any comparable state tax law) by reason of your Position arrangement, and you further agree that you will not seek any indemnification from the Company or its officers, employees or board of directors for any taxes, penalties or other costs or expenses you may incur should any aspect of your Position arrangement be found to be in violation of IRC Section 409A (or comparable state tax law). In order to expeditiously deal with

any disputes relating to or arising out of our employment relationship, you and the Company agree that any such disputes including but not limited to claims of harassment, discrimination, breach of contract, and wrongful termination, shall be fully and finally resolved by binding arbitration conducted by the American Arbitration Association in Santa Clara, California, pursuant to the Arbitration Rules set forth in California Code of Civil Procedure Section 1280, et seq., including Section 1283.05, and pursuant to the Federal Arbitration Act. The Company will pay the costs as provided in the American Arbitration Association's Employment Arbitration Rules then in effect.

This letter and attached Release Agreement constitute the entire agreement between yourself and the Company with respect to any matters referred to herein and supersedes any and all of the other agreements between yourself and the Company with respect to these matters, except for any confidentiality agreements and your Proprietary Information and Inventions Assignment Agreement with the Company which remain in full force and effect. No other consideration, agreements, representations, oral statements, understandings or course of conduct which are not expressly set forth herein should be implied or are binding. In the event that any provision hereof becomes or is declared by a court of competent jurisdiction to be illegal, unenforceable or void, the remaining provisions shall continue in full force and effect without said provision so long as the remaining provisions remain intelligible and continue to reflect the original intent of the Parties. Other than as governed by the Federal Arbitration Act, the terms and conditions of this agreement will be interpreted and construed in accordance with the laws of California.

**Certification of Chief Executive Officer
Pursuant to Exchange Act Rule 13a-14(a)/15d-14(a) As Adopted
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Richard P. Wallace, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of KLA-Tencor Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
